CANUTEC: 1-613-996-6666 (24 HOURS)

DIRECTIONS FOR USE:

DO NOT open pour more than 20 L of concentrate per day. Use an automatic addition system if using more than 20 L of concentrate per day. DO NOT contaminate irrigation or drinking water supplies or aquatic habitats by cleaning of equipment or disposal of wastes. DO NOT discharge effluent containing this product into sewer systems, lakes, streams, ponds, estuaries, oceans or other waters.

Biochek 80 is recommended for use in aqueous or water containing products and systems, including industrial, institutional and consumer pesticide products, in-can processes and products, to control the growth of bacteria and fungi. For effective preservation, add Biochek 80 to the product formulation at a rate of 200 to 2000 ppm based on the water content of the product (0.2 to 2.0 gr. Biochek 80/kg water content). Mix uniformly. The maximum application rate for paint preservation is 100 ppm.

PRECAUTIONS:

DANGER. KEEP OUT OF REACH OF CHILDREN. Corrosive. Causes irreversible eye damage. Causes skin burns. Harmful if inhaled. Harmful if absorbed through skin. May be fatal if swallowed. May cause allergic skin reaction. Causes asthmatic signs and symptoms in hyper-reactive individuals. Wear coveralls over long-sleeved

shirt and long pants, chemical-resistant gloves, socks, chemical-resistant footwear, and eye protection during mixing, loading, application, clean-up and repair. Wash thoroughly with soap and water after handling. Use only in well ventilated area. Remove contaminated clothing and shoes and wash them before reuse.

FIRST AID:

If in eyes, hold eye open and rinse slowly and gently with water for 15–20 minutes.

Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.

Call a poison control centre or doctor for treatment advice.

If on skin or clothing, take off contaminated clothing. Rinse skin immediately with plenty of water for 15–20 minutes. Call a poison control centre or doctor for treatment advice.

If inhaled, move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible. Call a poison control centre or doctor for further treatment advice.

If swallowed, call a poison control centre or doctor immediately for treatment advice. Do not induce vomiting unless told to do so by a poison control centre or doctor. Do not give any liquid to the person. Do not give anything by mouth to an unconscious person.

Take container, label or product name and Pest Control Product Registration Number with you when seeking medical attention.

TOXICOLOGICAL INFORMATION:

Aspiration may cause lung damage. Probable mucosal damage may contraindicate the use of gastric lavage. Measures against circulatory shock, respiratory depression and convulsions may be needed.

ENVIRONMENTAL HAZARDS:

Toxic to aquatic organisms.

DISPOSAL:

For Porta-Feed System: 1. Close valve. 2. The Porta-Feed System may be returned to the point of purchase (distributor/dealer). It must be refilled by the distributor/dealer with the same product. Do not reuse the Porta-Feed System for any other purpose.

For Other Containers: 1. Triple- or pressure- rinse the empty container. Add the rinsings to the treatment site. 2. Follow provincial instructions for any required additional cleaning of the container prior to its disposal. 3. Make the empty container unsuitable for further use. 4. Dispose of the container in accordance with provincial requirements. 5. For information on the disposal of unused, unwanted product, contact the Provincial Regulatory Agency or the manufacturer. Contact the Manufacturer and the Provincial Regulatory Agency in case of spill and for cleanup of spills.

STORAGE AND HANDLING:

Solutions are corrosive to many commonly used materials such as steel, galvanized irons, aluminum, tin, and zinc. These solutions can be stored and handled in baked phenolic-lined steel, polyethylene, stainless steel, or reinforced epoxy-plastic equipment. This product freezes at about -21C. Therefore, unless the storage tank is inside or underground, heating and insulation may be required. If heating is required exposure to high temperatures should be avoided. For short storage times (up to about 1 month), temperatures of up to 38C can be tolerated but the preferred maximum storage temperature is about 27C.

A stainless steel centrifugal pump is suggested for transfer service. Spiral wound stainless steel with Teflon is suitable for gasket and packing.
To prevent contamination store this product away from food or feed.

NOTICE TO USER:

This pest control product is to be used only in accordance with the directions on the label. It is an offence under the *Pest Control Products Act* to use this product in a way that is inconsistent with the directions on the label. The user assumes the risk to persons or property that arises from any such use of this product.
