NOTICE TO USER: This pest control product is to be used only in accordance with the directions on the label. It is an offence under the Pest Control Products Act to use this product in a way that is inconsistent with the directions on the label. The user assumes the risk to persons or property that arises from any such use of this product.

DIRECTIONS FOR USE

POST A COPY OF THIS LABEL IN THE WORK AREA

Bulab 6009 is used to control microorganisms in recirculating cooling and process water systems:

For the microorganism control on cooling towers and other parts of commercial and industrial recirculating cooling systems, Bulab 6009 is used at concentrations of 1.6 to 10.0 ppm (weight/weight) in the system. It is recommended that initially a slug dose of 5 to 30 ppm should be made and this initial dosage should be repeated until control is evident.

Subsequent additions of 1.6 to 10 ppm should be made every 1 to 5 days or as needed. The required frequency of treatment depends on the relative amount of bleedoff and severity of the microbiological fouling problem. Slug additions of Bulab 6009 should be made to the sump of cooling water towers.

STORAGE: Store used product in a well ventilated secure area at temperatures between 10°C and 30°C.

Do not freeze.

COMBUSTIBLE Do not use, pour, spill or store near heat or open flame.

IN CASE OF FIRE: Use dry chemicals, foam, waterfog or CO₂. Cool closed container with water. Emits toxic vapours during combustion.

PRECAUTIONS

DANGER KEEP OUT OF REACH OF CHILDREN

Do not get in eyes, on skin or on clothing. Do not breathe spray mists. Low concentrations of airborne aerosols are likely to cause respiratory and skin irritation.

When handling the concentrate, wear full face protection with cartridge respirator and impermeable gloves, aprons and boots. Use only in well ventilated area. Do not wear contact lenses.

When working or handling contaminated equipment, wear impermeable gloves. Wear impermeable aprons and boots if there is a potential for getting wet by the solution and fullface protection if there is a possibility of splashing. Use cartridge respirator if the area is not well ventilated.

FIRST AID

Eye exposure: Hold eye open and rinse slowly and gently with water for 15–20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control centre or doctor for treatment advice.

Skin or clothing exposure: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15–20 minutes. Call a poison control centre or doctor for treatment advice.

Inhalation: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible. Call a poison control centre or doctor for further treatment advice. □ □

Ingestion: Call a poison control centre or doctor immediately for treatment advice. Do not induce vomiting unless told to do so by a poison control centre or doctor. Do not give any liquid to the person. Do not give anything by mouth to an unconscious person.

Take container, label or product name and Pest Control Product Registration Number with you when seeking medical attention.

TOXICOLOGICAL INFORMATION: Note to physician: Probable mucosal damage following ingestion may contraindicate gastric lavage.

DISPOSAL

1. Triple- or pressure-rinse the empty container. Add the rinsings to the spray mixture in the tank. □ □
2. Follow provincial instruction for any required additional cleaning of the □ □ container prior to its disposal. □ □
3. Make the empty container unsuitable for further use. □ □
4. Dispose of the container in accordance with provincial requirements. □ □
5. For information on disposal of unused, unwanted product, contact the manufacturer or the provincial regulatory agency. Contact the manufacturer and the provincial regulatory agency in case of a spill, and for clean-up of spills. □ □
