Concord, ON L4K 3X5 1-905-669-9876

This insecticide is for use only in the automatic Mister dispenser, which releases 27.5 mg. of insecticide every 7-1/2 minutes. The continuous use of this insecticide during the first eleven (11) days of the leaf cutting bee incubation period will control chalcid parasites as they emerge from bee cells. One can will control parasites in an area of 7-14 cubic meters (250-500 cubic feet).

USE AREAS: This insecticide is for use only in alfalfa leaf cutting bee incubators while they are in operation during leaf cutting bee incubation. The area must have a minimum of 7 cubic meters (250 cubic feet) of free flow air space. One can is required for each 7-14 cubic meters (250-500 cubic feet) of incubation space.

DIRECTIONS: The automatic Mister dispenser should be located 2-3 meters (6-9 feet) above the floor at a point where air circulation will carry particles throughout the area. Do not install dispenser directly over bee cells in incubation tray. To install can, remove protective cap and spray button and screw into dispenser. One can of insecticide is required for each 7-14 cubic meters (250-500 cubic feet) of incubation space. Turn on the automatic Mister dispenser at the beginning of the incubation period (Day 0) and operate dispenser continuously for the first eleven (11) days of incubation. Turn dispenser off at Day 11 of the incubation period after eleven (11) full days of operation. The residual activity of the insecticide will control chalcid parasites until the onset of leaf cutting bee emergence.

PRECAUTIONS: KEEP OUT OF REACH OF CHILDREN. Contents under pressure. Container may explode if heated. Do not expose to temperatures above 50 degrees C. Do not puncture or incinerate. Do not contaminate food, feed or water. Avoid contact with skin and inhalation of spray mist. Wash after using. Contents toxic to fish and birds. ***Do not spray directly on leaf cutting bee cells.***

DISPOSAL: When container is empty, press valve to release all remaining pressure. Dispose of the container in accordance with provincial requirements. For information on disposal of unused, unwanted product, contact the manufacturer or the provincial regulatory agency. Contact the manufacturer and the provincial regulatory agency in case of a spill, and for clean-up of spills.

FIRST AID TREATMENT: In case of contact with eyes, hold eye open and rinse slowly and gently with water for 15–20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control centre or doctor for treatment advice. If on skin or clothing, take off contaminated clothing. Rinse skin immediately with plenty of water for 15–20 minutes. Call a poison control centre or doctor for treatment advice. If swallowed, call a poison control centre or doctor immediately for treatment advice. Do not induce vomiting unless told to do so by a poison control centre or doctor. Do not give any liquid to the person. Do not give anything by mouth to an unconscious person. Take container label or product name and Pest Control Product Registration Number with you when seeking medical attention.

TOXICOLOGICAL INFORMATION: Treat symptomatically

NOTICE TO USER: This pest control product is to be used only in accordance with the directions on the label. It is an offence under the *Pest Control Products Act* to use this product in a way that is inconsistent with the directions on the label. The user assumes the risk to persons or property that arises from any such use of this product.

This label transcript service is offered by the Pest Management Regulatory Agency to provide efficient searching for label information.
