Secondary panel:

Provides a fogging action over a large area and kills Flies, Mosquitoes, Wasps and Hornets.

DIRECTIONS FOR USE: This product is ready to use. Always shake before use. Hold can upright while spraying in a sweeping motion. Point valve opening away from face. Within the specified use location, to enhance effectiveness of this product, apply directly to listed pests where possible. For all labelled uses, treatment must only be repeated after 7 days if the pest problem persists or reoccurs. When applied indoors, good sanitary practices should be maintained to prevent re-infestation.

Use Limitations for all Uses:

- **DO NOT apply when people or pets are present.**
- **DO NOT allow people or pets to enter treated areas until sprays have settled after an indoor space treatment.**
- **When applied indoors: Cover or remove all food/feed. Cover all food/feed processing surfaces, equipment and utensils or thoroughly wash them following treatment. Any food/feed accidentally contaminated with spray solution must be discarded. Ventilate treated areas after application by opening windows and doors or using fans, where required, to aid in the circulation of air.**
- **When applied outdoors: DO NOT apply in areas where plants are grown for food or feed (e.g., vegetables, fruit, herbs).**

DO NOT apply to any body of water. DO NOT contaminate irrigation or drinking water supplies or aquatic habitats by cleaning of equipment or disposal of wastes. Avoid application of this product when winds are gusty.

FOR INDOOR USE AT GARAGES AND COVERED SCREENED PATIOS:

HOW TO APPLY: APPLY AS A SPACE SPRAY ONLY. Space application is a suspension of fine droplets in the air within an indoor space.

To kill flies, mosquitoes, wasps and hornets in garages and covered screen patios: Close all windows and doors and shut off all ventilating systems and sources of ignition before treatment. While holding can at arm's length, spray upward to all parts of the room, especially ceiling, upper corners of the room, windows and other light sources. Keep spray at least 1 m from interior walls, fabrics and furniture. Begin application at far side of the room and work backwards toward exit. Direct spray towards ceiling or rafters. **DO NOT** exceed the max spray rate of 2 – 3 seconds per 30 cubic metres for all indoor space spray applications.

2023-2036
10-08-2023

Vacate the treated area and keep windows and doors closed for 15 minutes, then ventilate for 15 minutes before re-entry.

FOR OUTDOOR USE AROUND BUILDINGS:

Allow fog to drift over area. Because insects may move in from other areas, treat an area larger than you plan to use.

To kill flies, mosquitoes, wasps, and hornets on bushes or grasses. When listed pests (are a problem/first appear), spray to thoroughly cover all foliage, including upper and lower leaf surfaces until damp. **DO NOT** wet plants to the point of runoff or drip. When spraying, hold can on slight downward angle 1.5-2m from plants to avoid wetting the foliage. **DO NOT** exceed the spray rate of 1 second per 1m². Apply early in morning or evening, not in direct sunlight. Spray only when air is still and temperature is below 32°C. Use with caution on new growth and on tender young plants and foliage. Test on one or two leaves to determine safety.

PRECAUTIONS: KEEP OUT OF REACH OF CHILDREN AND PETS. **DO NOT** inhale the spray. **DO NOT** apply in areas with no or poor ventilation. KEEP FROM FREEZING. CONTENTS UNDER PRESSURE. **DO NOT** puncture or incinerate the container. **DO NOT** place in hot water or near radiators, stoves, or other sources of heat.

FIRST AID: If swallowed: Call a poison control centre or doctor immediately for treatment advice. **DO NOT** induce vomiting unless told to do so by a poison control centre or doctor. **DO NOT** give any liquid to the person. **DO NOT** give anything by mouth to an unconscious person. **If on skin or clothing:** Take off contaminated clothing. Rinse skin immediately with plenty of water for 15–20 minutes. Call a poison control centre or doctor for treatment advice. **If inhaled:** Move the person to fresh air. If the person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible. Call a poison control centre or doctor for further treatment advice. **If in eyes:** Hold eye open and rinse slowly and gently with water for 15–20 minutes.

Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control centre or doctor for treatment advice. Take the container, label or product name and Pest Control Product Registration Number with you when seeking medical attention.

TOXICOLOGICAL INFORMATION: Treat symptomatically. This product contains petroleum distillates. Vomiting may cause aspiration pneumonia. Skin exposure may cause transient sensations (tingling, burning, itching, numbness). Other symptoms of exposure could include respiratory effects (such as cough, respiratory irritation, or shortness of breath), nausea, headache or dizziness.

ENVIRONMENTAL PRECAUTIONS:

Toxic to aquatic organisms. Toxic to bees. **DO NOT** spray bees. Avoid application around blooming plants. If applications must be made during blooming period, restrict applications to evening when most bees are not foraging.

10-08-2023

STORAGE: Store this product away from food or feed. **DO NOT** store at temperatures over 50°C.

DISPOSAL: Unused or partially used products should be disposed at provincially or municipally designated hazardous waste disposal sites. When container is empty, press valve to release all remaining pressure. Empty containers may be recycled in communities where (steel) aerosol can recycling is available. If recycling is not available, wrap and discard the empty container in household garbage. DO NOT reuse the empty containers.
