CHRYSTALLINE H2O

**GRANULAR ALGAECIDE
CONTROLS ALGAE
CLARIFIES WATER
STABILIZES THE pH
CHLORINE REDUCER**

DOMESTIC

GUARANTEE: Elementary copper under copper sulphate form : 5% - Copper sulphate pentahydrate: 19.4%

REGISTRATION No: 24952 PCP Act

**KEEP OUT OF REACH OF CHILDREN
READ THE LABEL BEFORE USING**

NET CONTENTS: 110g

7126298 Canada Inc. 953, 66 Rue du Parc, Saint-Appollinaire (Qc) G0S 2E0 Tel. : 1-888-478-4430

PRECAUTIONS : Harmful if swallowed. Do not mix with any other chemical. Avoid contact with skin and eyes. Rinse container thoroughly before discarding. Do not reuse. Rinse hands with water after handling product. Do not contaminate irrigation or drinking water supplies or aquatic habitats by cleaning of equipment or disposal of waste. Do not apply this product in a way that will contact adults, children or pets.

FIRST AID : If in eyes, hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control centre or doctor for treatment advice. If on skin or clothing, take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control centre or doctor for treatment advice. If swallowed, call a poison control centre or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control centre or doctor. Do not give anything by mouth to an unconscious person. Take container, the label or product name and pest Control Product Registration Number with you when seeking medical attention.

TOXICOLOGICAL INFORMATION : Treat symptomatically.

DISPOSAL : Do not reuse empty container. Wrap and dispose of empty container with household garbage. For information on disposal of unused, unwanted product, contact the

manufacturer of the provincial regulatory agency. Contact the manufacturer and the provincial regulatory agency in case of spill and for clean-up of spills.

DIRECTIONS FOR USE

Opening of the swimming pool

In spring, to clean your water, you just have to dilute 1/2 in 1 cup of chlorine in one gallon of hot water and pour it, into your swimming pool. That way, the chlorine will dilute easier and faster. While water is getting clearer and clearer, it is very important to do backwash at every 6 hours, until your water is clear. Also, you should pass the vacuum in the position “drain or waste” to remove what’s left of leaves or other solid residue from your swimming pool.

When your water is clear, it is necessary to wait 24 hours and then, balance your water as follows:

- The alkalinity has to be between 80 and 120 (ideally between 90 and 110)
- The pH has to be between 7.2 and 7.8 (ideally 7.4)

Mode of use

Crystalline H₂O is easy to use. Here is how to start using it, even if you start in the middle-season:

- A) First week, when the water is clear and balanced, it is necessary: to put one dose of Crystalline H₂O in the skimmer and, another dose must be dissolved in hot water and poured into the swimming pool. Maintain the level of chlorine at 1.5 ppm.
- B) The second week, put one dose in the skimmer, lower down the level of chlorine at 0.6 ppm and maintain it at this level for summer. This level of chlorine (0.6 ppm) is the minimum detectable concentration on water analysis kit.

For Crystalline H₂O to be effective, you have to respect the suggested quantity. If during a test, the pH is too high, you have to decrease a little quantity of Crystalline H₂O and the pH should return to the normal, which is between 7.2 and 7.8.

Recommendation: Store Crystalline H₂O in a dry area. Do not manipulate the product with wet hands in order to keep the efficacy of the product.

WEEKLY DOSE SUGGESTED (after the backwash)

ROUND

Diameter	Volume	Quantity of Crystalline H₂O
-----------------	---------------	---

Feet	Gallons	Litres	Gram c.c	ou ml
15	4400	20000	8	8
18	6300	28600	11	11
21	8600	39000	16	16
24	11200	51800	21	21
27	14200	64800	26	26

RECTANGULAIRES (average depth 5 feet)

Diameter	Volume		Quantity of Crystalline H2O	
Feet	Gallons	Litres	Gram c.c	ou ml
15 x 30	14000	63600	25	25
16 x 32	16000	72700	29	29

Note: for convenience, assume

1 ml = 1g of product.

Use the measuring cup included
