PRECAUTIONS

CAUTION: EYE IRRITANT

HARMFUL IF SWALLOWED

Avoid contact with eyes or prolonged contact with skin. Do not allow others such as children and pets on treatment areas during application or to re-enter treated areas until spray has dried. Wash immediately after using this product.

FIRST AID

Take container, label or product name and Pest Control Product Registration Number with you when seeking medical attention.

If in eyes: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control centre or doctor for treatment advice.

If on skin or clothing: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control centre or doctor for treatment advice.

If swallowed: Call a poison control centre or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control centre or doctor. Do not give anything by mouth to an unconscious person.

If inhaled: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible. Call a poison control centre or doctor for further treatment advice.

TOXICOLOGICAL INFORMATION

No specific antidote. Treat symptomatically. Employ supportive care. Treatment should be based on judgment of the physician in response to reactions of the patient.

For further information consult the Material Safety Data Sheet.

STORAGE

Do not ship or store with food, feeds, drugs or clothing. Do not contaminate water, foodstuffs, seed or feed by storage or disposal.

DISPOSAL

Dispose of empty container with household garbage. Do not re-use container.

GENERAL INFORMATION

Glyphosate 18% Herbicide Solution Concentrate, a non-selective vegetation control herbicide, controls most annual and perennial grasses, including lawn grasses, broadleaf weeds and brush (i.e. virtually anything that is green and growing). As a systemic herbicide, it is absorbed by the leaves and moves throughout stem and roots to control the entire plant. Visible symptoms of control will occur within 3 days with complete kill in 2-4 weeks. NOTE: Glyphosate 18% has no soil activity and will not leach or run off to affect nearby vegetation. Plants must be present to be controlled. Repeat applications will be required as new seedlings and vegetation emerge.

GENERAL USE PRECAUTIONS

CAUTION: Avoid spray contact on desirable plants as any plant contacted may be killed. Do not spray in windy conditions. Do not spray to the point of run-off. Rain or watering two hours after application will not wash away effectiveness. However, heavy rainfall immediately after application may wash the chemical off the foliage and repeat treatment may be required. Do not apply if rainfall is forecast for the time of application.

Glyphosate is not to be applied using hand-wicking or hand-daubing methods.

DIRECTIONS FOR USE

READ THE ENTIRE LABEL BEFORE USE. FAILURE TO FOLLOW LABEL INSTRUCTIONS MAY RESULT IN ERRATIC WEED CONTROL OR PLANT DAMAGE.

Not for reformulation or repackaging.

APPLICATION DIRECTIONS

USE	APPLICATION INSTRUCTIONS	CONTROLS	MIXING/COVERAGE
Undesirable vegetation control (i.e. hard to mow areas, around buildings). Lawn trimming/edging, patio weed control, vacant lots, storage & recreational areas, driveways	Apply to vigorously growing plants. Apply to annual weeds anytime after emergence. For perennial weeds apply after seed heads, flowers or berries appear.	Most annual and perennial grasses and weeds, such as quackgrass, chickweed, ragweed, knotweed, poison ivy, Canada thistle, milkweed, bindweed.	1) Mix 100 mL of product in 2.0 L of clean water (1 part Glyphosate 18%, 20 parts water). 2) Apply prepared solution over equivalent of 40 square meters (10 paces x 4 paces [†]).
Around trees/shrubs/ornamentals	Apply around base in a neat fashion. Avoid spray or drift contact with foliage, stems or green bark of desirable plants		3) Ensure uniform and complete spray coverage but not to the point of run-off.
Lawn/garden renovation	For best results on lawns, skip one mowing prior to treatment. Allow at least 3 days after treatment before disturbing the soil and/or replanting.		Note: Mix only enough spray solution to treat intended area. Rinse sprayer thoroughly after each use. Do not store spray mixture in sprayer for prolonged periods.
Brush control	Apply after leaves are fully expanded. Treat trees and brush up to 1.5 m in height only; for taller plants cut down and spray regrowth.	Most brush such as Poplar, Alder, Maple and Raspberry	Do not use hose-end sprayers. [†] 1 pace = approx. 1 meter
