Stop squirrels raiding your bird feeders

DIRECTIONS FOR USE:

This product may be used to discourage feeding by tree squirrels on feeds used to attract and nourish wild birds. Feed treated with this product may be used in yards around homes and other buildings where seeds are placed in feeders or on the ground. Outdoors, in a protected area out of the wind, mix one tablespoon of this product with 0.454 kg (one pound) of bird seed. (This means one part of this product with 42 parts (by weight) of bird seed.) Use a container that can be completely sealed and is large enough to facilitate mixing of this product with the amount of feed that you intend to treat. Close top of container securely and shake container thoroughly, inverting the container occasionally to promote complete mixing. Mix for 1/4 to 1/2 minute so that the seed saver uniformly covers the seed. Fill feeders with feed treated with product or place such feed on the ground in the manner appropriate for the species of birds that you are trying to attract and feed. To maintain even mixing of feed and Squirrel Proof Seed Saver, treated feed that is stored should be shaken again, in a sealed container, whenever portions of it are removed for the bird feeders.

PRECAUTIONS: KEEP OUT OF REACH OF CHILDREN. Causes moderate eye irritation. Avoid contact with eyes or clothing. Wash thoroughly with soap and water after handling. Wash hands before touching eyes or face and prior to using the washroom. Wear waterproof gloves and protection eyewear (goggles or face shield) when mixing or handling the product and/or when loading feeds made from this product into feeders situated near or above eye level. Do not mix this product indoors or in a downwind position.

DISPOSAL: Do not reuse empty container. Dispose of empty container with household garbage.

ENVIRONMENTAL HAZARDS: DO NOT apply to any body of water.

FIRST AID: IF IN THE EYES: hold eye open and rinse slowly and gently with water for 15–20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control centre or doctor for treatment advice. **IF ON THE SKIN OR CLOTHING:** take off contaminated clothing. Rinse skin immediately with plenty of water for 15–20 minutes. Call a poison control centre or doctor for treatment advice. **IF INHALED:** move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible. Call a poison control centre or doctor for further treatment advice. **IF INGESTED:** call a poison control centre or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control centre or doctor. Do not give anything by mouth to an unconscious person. Take container, label or product name and Pest Control Product Registration Number with you when seeking medical attention.
