Mississauga, Ontario L5N 0C9
1-800-265-5475

45 K9 Advantix 10 Flea, Tick, Mosquito and Lice Adulticide will control fleas, ticks and lice
46 on dogs within one day of treatment and will continue to protect the dog from further
47 flea, tick and lice infestation for at least four weeks. K9 Advantix 10 Flea, Tick, Mosquito
48 and Lice Adulticide also kills mosquitoes. Re-infestation from the emergence of new
49 fleas and ticks in the environment may continue to occur for six weeks or longer after
50 treatment is initiated. Re-treatment at monthly intervals is required if re-infestation is
51 continuous or if flea and tick control is desired.

52
53 For effective flea, tick and lice control, treatment of the pet should be combined with the
54 sanitation of any area used by the pet. Vacuum floors, carpets, and furniture (discard
55 vacuum bag after use) and wash the pet's bedding, living quarters, and surrounding
56 areas. If pest problems persist, an insecticidal premise treatment may be required.
57 Shampooing of the dog may shorten the duration of protection, therefore, re-application
58 following shampooing is recommended.

59
60 The successive feeding activity of fleas on pets may elicit a hypersensitivity skin
61 disorder known as flea allergy dermatitis (FAD). Treatment of pets with K9 Advantix 10
62 Flea, Tick, Mosquito and Lice Adulticide rapidly kills fleas and may reduce incidence of
63 this condition. For use on pregnant/lactating animals, consult your veterinarian.

64
65 **PRECAUTIONS:**

66
67 **HUMANS: KEEP OUT OF THE REACH OF CHILDREN.** Harmful if swallowed, or
68 absorbed through the skin. Causes eye irritation. **DO NOT** get in eyes. Avoid contact
69 with skin and clothing. Avoid contact with pets until dry. Wear rubber gloves when
70 applying product. After handling or applying, wash hands (or any other skin that came
71 into contact with the product) with soap and water. This product is extremely toxic to
72 fish. Do not contaminate water, feed or food by storage or disposal.

73
74 **PETS: Toxic to cats.** Cats that actively groom or engage in close physical contact with
75 recently treated dogs may be at risk of serious harm, including death. Sensitivities may
76 occur after using any pesticide for pets. Smaller animals are more likely to experience
77 an adverse reaction. Observe carefully.

78 Consult a veterinarian before using on sick, aged, pregnant or nursing animals or
79 animals receiving drug or other pesticide treatment.

80 Do not use on animals under 8 weeks of age.
81

Side Effects: Monitor your dog after application. Side effects may include: skin irritation such as redness or scratching; changes in behaviour such as agitation or lethargy; or gastrointestinal effects such as vomiting or loss of appetite. If these or other side effects occur, consult your veterinarian or Elanco at 1-800-265-5475.

82
83 **FIRST AID:**
84

85 HUMANS: If in eyes: Hold eye open and rinse slowly and gently with water for 15-20
86 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue
87 rinsing eye. Call a poison control centre or doctor for treatment advice.
88 If swallowed: Call a poison control centre or doctor immediately for treatment advice.
89 Have person sip a glass of water if able to swallow. Do not induce vomiting unless told
90 to do so by a poison control centre or doctor. Do not give anything by mouth to an
91 unconscious person.
92 If on skin or clothing: Take off contaminated clothing. Rinse skin immediately with plenty
93 of water for 15-20 minutes. Call a poison control centre or doctor for treatment advice.
94 Take container, label or product name and Pest Control Product Registration Number
95 with you when seeking medical attention.

96
97 PETS: If signs of sensitivity occur, bathe the pet with mild soap and rinse with large
98 amounts of water. If signs continue, consult a veterinarian immediately.

99
100 TOXICOLOGICAL INFORMATION: Treat the patient symptomatically.

101
102 DISPOSAL: Wrap empty tube and cap in newspaper and dispose in household
103 garbage.

104
105 DIRECTIONS FOR USE:

106 This product contains imidacloprid and permethrin. Do not apply another pest control
107 product such as a shampoo, collar, or powder that contains imidacloprid or permethrin
108 to the treated animal after applying K9 Advantix 10 Flea, Tick, Mosquito and Lice
109 Adulticide.

- 110 • Do NOT administer by mouth. Do not use on puppies under 8 weeks of age.
- 111 • A veterinarian should be consulted when pest infestation continues to be a
112 problem on the pet.
- 113 • Do not use on cats or kittens. Consult a veterinarian before using on sick, aged,
114 pregnant or nursing animals or animals under drug or other pesticide treatment.
- 115 • Use only on dogs 4.5 kg and under. This product is packaged in single dosage
116 tubes. This package contains one to six monthly 0.4 mL dosages. Treat your dog
117 or puppy monthly in the manner described below. Do not apply a dosage greater
118 than one 0.4 mL tube at one time.
- 119 • Re-treatment at monthly intervals is required if re-infestation is continuous or if
120 flea, tick and lice control is desired.
- 121 • Remove one applicator from the package.
- 122 • Hold applicator tube in upright position. Pull cap off tube.
- 123 • Turn cap around and place other end of cap back on tube.
- 124 • Twist cap to break seal, then remove cap from tube.
- 125 • The dog should be standing for easy application. Part the hair on the dog's back
126 between the shoulder blades until the skin is visible. Place the tip of the tube on
127 the skin and squeeze the tube to completely empty the contents directly on the
128 skin. Do not get this product in your pet's eyes or mouth.
- 129 • Discard the empty tube as described in "DISPOSAL".
