Made and printed in U.S.A.

[BACK OR SIDE PANELS - ENGLISH]

[OPTIONAL ICON & WORDING] For Indoor and Outdoor Use]
[OPTIONAL ICON & WORDING] [Water Based]

[This insecticide contains the active ingredient spinosad which is derived from a naturally occurring bacterium, *Saccharopolyspora spinosa*.]

[Inside the station is a [blend/mix/formula/bait] [of/with] food, water and insecticide to kill ants.]

Ants carry bait back to their nest to kill the colony.

[Kills/Eliminates [the colony] [and] [the queen]]

[Can be used indoors and outdoors around the perimeter of homes]

DIRECTIONS FOR USE:

WHEN TO USE: Treat when ants appear. [Treat when ants are present.]

WHERE TO USE: Indoors and outside where ants are present or where they travel to find food or water. [(e.g.,] [Kitchens/Bathrooms/Basements/ Garages/Laundry Rooms).] [Common areas to find ants include: along baseboards, in corners of rooms and cabinets, under and behind appliances, under sinks, on window sills, around doorways, or near garbage cans.]

HOW TO USE:

Remove bait station(s) from package and separate stations along perforation.

- 1 Grab station around the outer edges and hold upright.
2. Snap open [and fold back] [the [top] end] to expose bait inside. [Avoid squeezing the foil side when opening].
3. Fold and [tuck/hook] the [upper/top] tabs [around/under] the [station's] outer [edge/base] to secure.
4. Place station(s) [[with] THIS SIDE UP [facing upward]] in areas of ant activity. Place stations 1.5 - 3 metres apart. Use 2 bait stations per 15 m². When ant infestations are heavy use up to 4 bait stations per 15 m².
5. Protect the station from rain and sun when used around the outside perimeter of the home. Do not place bait station on soil.
6. Monitor station(s) regularly. Keep the station(s) dry while in use. It is recommended that the bait stations be replaced after 3-4 weeks or once [the] bait has been consumed. The bait stations should remain in place for 3 months to ensure that ant colonies are killed.

[HELPFUL TIPS:]

- [Do not place stations in areas that have been recently sprayed with insecticide as this may reduce effectiveness.]
- [For large infestations, multiple stations may be required.]
- [Transparent/Translucent station lets you know when it is time to replace the station.]

PRECAUTIONS:

KEEP OUT OF REACH OF CHILDREN. POTENTIAL SKIN SENSITIZER.

Keep away from food and drinks, including those for animals. Do not eat, drink and smoke during use. Wash hands after use. During use, keep station away from dogs. Do not try to open the STATION. Follow the directions for use so as to avoid risks to humans and the environment.

FIRST AID:

If in eyes, hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control centre or doctor for treatment advice. **If on skin or clothing**, take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control centre or doctor for treatment advice. **If inhaled**, move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible. Call a poison control centre or doctor for further treatment advice.

If swallowed, call a poison control centre or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control centre or doctor. Do not give anything by mouth to an unconscious person. Take container, label or product name and Pest Control Product Registration Number with you when seeking medical attention.

TOXICOLOGICAL INFORMATION:
