Sani Marc

HALOGEN

Controls bacteria and algae in spa & hot
tub waters.
Soluble Granules

DOMESTIC

GUARANTEE: Sodium Bromide99.2%

REG. NO. 31956 P.C.P. ACT

WARNING

POISON CORROSIVE

KEEP OUT OF REACH OF CHILDREN
READ THE LABEL BEFORE USING

Net Contents : 250 g – 30 Kg

SANI-MARC INC.
42, rue de l'Artisan, Victoriaville, (Québec) G6P 7E3
Telephone: 1-866-470-7264

PRECAUTIONS:

KEEP OUT OF REACH OF CHILDREN. Harmful if swallowed. Causes eye and skin irritation. Prolonged eye and skin contact may cause severe irritation. Irritating to nose and throat. Do not breathe dust. Avoid contact with eyes, skin or clothing. Do not mix with any other chemical. Use with adequate ventilation. Wash thoroughly with soap and water after handling. Remove contaminated clothing and wash before re-use. Do not wear contaminated shoes. Do not smoke, drink or eat when handling. For good hygiene practice, wear safety goggles and chemical resistant gloves when handling this product

ENVIRONMENTAL HAZARDS:

This product is toxic to fish and aquatic invertebrates. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waters.

FIRST AID:

IF SWALLOWED: Call a poison control centre or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control centre or doctor. Do not give anything by mouth to an unconscious person.

IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control centre or doctor for treatment advice.

IF INHALED: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible. Call a poison control centre or doctor for further treatment advice.

IF IN EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control centre or doctor for treatment advice. Take container, label or product name and Pest Control Product Registration Number with you when seeking medical attention.

TOXICOLOGICAL INFORMATION: Treat symptomatically.

STORAGE: Keep in original container during storage. Store product in cool, dry, well ventilated place To prevent contamination, store this product away from seed, food, feed, fertilizer, or other pesticides. Keep away from fire or open flame, or other source of heat.

DISPOSAL:

Rinse container thoroughly before discarding. Do not reuse empty container. Offer for recycling if available, or dispose in accordance with local and provincial regulations.

For information on the disposal of unused, unwanted product, contact the manufacturer or provincial regulatory agency. Contact the manufacturer and provincial regulatory agency in case of a spill, and for clean-up of spills.

DIRECTIONS FOR USE:**INITIAL DOSAGE:**

Upon initial filling of spa with fresh water, add HALOGEN to a spa equipped with a bromine generator device. Refer to the operating manual of the device for the required concentration of BROMICHARGE. This will be identified as a concentration of sodium bromide. The level can be tested with a salt test kit or by taking a water sample to a spa and hot tub store.

MAINTENANCE:

Maintain the following daily levels in water as determined by testing kit.

Bromine: 3.0 – 5.0 ppm

pH: 7.2 – 7.8

Total alkalinity: 100 – 200 ppm
Calcium hardness: 150 – 200 ppm

The bromine generator device will operate to produce available bromine as designed until the bromide reserve goes below required levels. HALOGEN should be added if the bromide level drops below the minimum levels. Dilution, splash out and leaks are primary reasons for the bromide level to drop. If the bromine generator device does not produce enough available bromine, make sure the recommended level of sodium bromide is still present in the spa water as per the bromine generator device's operating manual.

Before entering the spa the bromine level should be tested. Maintain between 3.0 –5.0 ppm as free available bromine level. If the bromine level is above the recommended levels, turn the spa off until the level drops to 5 ppm. For more immediate results, dilution with fresh water will lower the bromine level.

For proper sanitation, the spa must be completely drained periodically. The number of days between COMPLETE SPA DRAINAGE is equal to the volume of spa water in litres, divided by 10 times the maximum number of daily spa users. Refill spa with water and repeat DIRECTIONS FOR USE above.

Maximum spa water usage temperature is 40°C. Duration in spa water at 40°C should not exceed 15 minutes.

NOTICE TO USER: This pest control product is to be used only in accordance with the directions on the label. It is an offence under the Pest Control Products Act to use this product in a way that is inconsistent with the directions on the label. The user assumes risk to persons or property that arises from any such use of this product.
