TCCA Borate

Swimming pool algicide and bactericide

DOMESTIC

TABLET

REG. NO. 32973 P.C.P. ACT

KEEP OUT OF REACH OF CHILDREN READ
THE LABEL BEFORE USING

ACTIVE INGREDIENT:

Available chlorine, present as trichloro-s-triazinetrione..... 86.4%

DANGER

POISON

**CORROSIVE
TO EYES, SKIN IRRITANT**

Strong oxidant. Contamination or improper use may cause fire, explosion or the release of toxic gases. Add product only to water. **DO NOT** use in feeders, floaters or any other dispensers that have been used with any other product.

NET CONTENTS: 500g - 30 kg

Sani Marc Inc.

TCCA Borate contains slow-dissolving stabilized chlorine and a clarifier. TCCA Borate is specially formulated to help clarify pool water. The dual action formula of TCCA Borate ensures a continuous supply of chlorine and clarifier in pool water. Regular use of TCCA Borate will help keep water crystal clear. The TCCA Borate formula is ideal for clarifying pool water fed by artesian wells. TCCA Borate destroys organic matter in pool water such as sunscreen, shampoo, leaves, etc. TCCA Borate's 2-in-1 stabilized chlorine and clarifier formula saves on storage space at home and simplifies pool maintenance. Regular use of TCCA Borate reduces the need for additional clarifying products to keep pool water clear. Using TCCA Borate will make water noticeably softer to the touch.

For clear pool water, follow our 3-step pool maintenance program: Step 1: Balancing Step 2: Sanitizing and Step 3: Weekly shock treatment

DIRECTIONS FOR USE

Weight per tablet 15 to 600 g.

Use in a floating dispenser, automatic chlorinator or feeder designed for this product, or place in skimmer. Do not place directly in the pool, as it may cause vinyl or painted pool surfaces to discolor.

Check water values daily with a test kit to ensure they are at the proper levels

Free available chlorine: 1.0 – 3.0 ppm

pH: 7.2 – 7.8

Total alkalinity: 100 – 120 ppm

Calcium hardness: 200 – 300 ppm

Promptly make any necessary adjustments by using the appropriate Sani Marc pool care products.

If using an automatic chlorinator, fill the receptacle(s) with TCCA Borate tablets and adjust the flow rate according to the manufacturer's recommendations to maintain daily chlorine residual at the desired level. Alternatively, add tablets to skimmer basket. Maintain proper daily chlorine residual by adding 50 grams of TCCA Borate per 10 000 L of pool water, weekly or as often as needed.

NOTE: In hot weather, after rain or heavy pool use, higher doses may be needed to maintain chlorine residuals at the proper level.

Regular superchlorination of the pool water is recommended. Follow the label instructions of the Sani Marc superchlorination product used.

TCCA Borate contains a cyanuric acid stabilizer which can accumulate in pool water. Stabilizer levels should be checked periodically with a test kit. Keep stabilizer levels within the recommended 30-100 ppm range by diluting the pool water with fresh water when necessary. Promptly make any necessary adjustments by using the appropriate Sani Marc pool care products.

OPENING YOUR POOL

Balance the pool water, perform a shock treatment, and add the Sani Marc chlorinator and algaecide according to the label instructions. Do not enter the pool until you have confirmed chlorine residual at 1 to 3 ppm with a reliable test kit or test strip.

SHOCK TREATMENT

Perform a weekly shock treatment with a Sani Marcshock product to kill bacteria and organic contaminants. Follow the label instructions on the shock treatment product. Immediately after the shock treatment, thoroughly clean all pool surfaces with a pool brush and by running the water through the filter.

Do not enter the pool until you have confirmed chlorine residual at 1 to 3 ppm with a reliable test kit or test strip.

PRECAUTIONS

KEEP OUT OF REACH OF CHILDREN. DO NOT use this product so that it comes into direct contact with children or pets. Harmful or fatal if swallowed. This product is irritating to the respiratory tract. May be fatal if inhaled. Avoid inhaling dust and fumes generated by this product.

Corrosive to eyes. Severely irritating to the skin. DO NOT get in eyes, on skin or on clothing. Do not handle with bare hands. Wearing rubber gloves when handling this product is recommended. Wash hands before eating, drinking, chewing gum, smoking or using the toilet. Remove and wash contaminated clothing before reuse. Strong oxidizing agent. Dangerous gas formed when mixed with acid. Do not use in feeders, floaters, skimmers or any other dispensers that have been used with any other product. Do not mix with any other chemical. Do not allow product to contact any foreign matter, including other pool/spa treatment products. Do not let product get wet or damp before using. Do not add water to this product. Add product only to water. Do not mix this product in a small amount of water. If the product is exposed to small amounts of water, it can react violently to produce heat and toxic gases and splatter. Contamination or improper use may cause fire, explosion or the release of toxic gases. Keep away from flame and burning material (like a lighted cigarette).

FIRST AID

IF SWALLOWED: Call a poison control centre or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control centre or doctor. Do not give anything by mouth to an unconscious person.

IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15 to 20 minutes. Call a poison control centre or doctor for treatment advice.

IF INHALED: Move person to fresh air. If the person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth, if possible. Call a poison control centre or doctor for treatment advice.

IF ON EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control centre or doctor for treatment advice.

Take container, label or product name and Registration Number with you when seeking medical attention.

TOXICOLOGICAL INFORMATION: Probable mucosal damage may contraindicate the use of gastric lavage. Treat symptomatically.

ENVIRONMENTAL HAZARDS: This product is toxic to fish and aquatic organisms. DO NOT contaminate irrigation or drinking water supplies or aquatic habitats by cleaning of equipment or disposal of wastes.

STORAGE Keep product dry in its tightly closed container when not in use. Store container in a cool, dry and well ventilated place. Keep container away from heat and open flame. Do

not contaminate food for human or animal consumption by the improper disposal, storage or cleaning of equipment.

DISPOSAL: DO NOT reuse the empty containers. Dispose in household garbage. Unused or partially used products should be disposed at provincially or municipally designated hazardous waste disposal sites.

EASY 2-IN-1

Sanitizes and clarifies pool water
Eliminates algae and helps prevent future growth
Eliminates algae in pool water
Effective treatment against algae in pool water
Provides crystal clear water by destroying bacteria and algae in pool water
Pool algaecide and bactericide
Helps protect against algae growth
Protects chlorine from the sun to extend its effective lifespan
Prevents green water
Kills bacteria in pool water
All-in-one sanitizer and clarifier
Dual sanitizing-clarifying action
Dual action tablets
Dual action tablets for routine pool care
Worry-free sanitizer-clarifier
Reduces the amount of chlorine needed by preventing organic growth
Leaves no residue
Softens water
Safe for all pool surfaces
For use in a floater or chlorinator
Safe for use in skimmers
Easy to use
Great alternative to calcium-based sanitizers
Great alternative to liquid sanitizers
Prevents the appearance of black, yellow or mustard algae
Prevents the appearance of black algae
Prevents the appearance of yellow algae
Prevents the appearance of mustard algae
Slow dissolving tablets
Slow dissolving formula makes maintaining chlorine levels easy
Will not stain pool equipment
Will not stain pool liner
Better regulates the release of chlorine
Steady release of chlorine
Improves the efficiency of chlorine
Makes stabilizer levels easier to control
Ideal for well water-fed pools
Compatible with salt-based chlorine generators
Compatible with cartridge filters
Ideal for heated pools
Improves the efficiency of the filtration system
Quickly resolves cloudy water in pools
Reduces the turbidity of water
Ideal for use with well water
Ensures sparkling clear water
Clarifying action
Makes water softer to the touch
Makes water feel silky smooth
For softer water
Pool water softener
