ULTRASONIC RODENT REPELLERS

Plug it in...  
Drives Rodents Out!

[3 Pack][4 Pack]

Note: ultrasonic signal loses intensity as it travels. It is also absorbed by soft objects such as carpeting and is reflected by hard surfaces, such as furniture. Ultrasonic signals cannot reach nesting or feeding places behind walls, under floors, or within cracks. Multiple units may be necessary for larger rooms. In some cases, over time, certain rodents may become accustomed to ultrasonic signals. Some may return to their feeding or nesting areas even in the presence of an ultrasonic product.

Warning: This unit is safe for non-rodent pets such as dogs and cats. Do not use this product around pet ferrets, tarantulas, rabbits or rodent pets such as gerbils, hamsters and guinea pigs.

Indoor use only.

## Thank You

Thank you for choosing the Bell & Howell® Ultrasonic Rodent Repeller. This manual will provide you with the instructions for using this product effectively and efficiently. Please read the manual carefully before using this product and keep it on file for future reference.

## Directions for Use:

NOTE: The Bell & Howell Ultrasonic Rodent Repeller is simple to use. It operates on any standard 120 volt wall outlet. Simply plug it in. This product should be used in rooms where signs of mouse or rat activity are observed, particularly in areas where food is consumed, prepared or stored. The red indicator light on the front of the unit will blink on and off to let you know that the unit is working. Please note that a slight “clicking” noise may be heard as the indicator light blinks on and off. This is normal.

This product is safe to use around plants and pets such as dogs, cats and fish. Since this product was developed to repel rodents, it is not advisable to use this product around pet ferrets, tarantulas and rabbits or rodent pets such as gerbils, hamsters and guinea pigs.

(diagrams of device – front, side and top views indicating the speaker, LED indicator and AC plug)

## Tips for Increasing Product Efficiency:

1. Use the Bell & Howell Ultrasonic Rodent Repeller continuously.
2. Make sure that all foodstuff is put away. The smell of food attracts rodents and will decrease the efficiency of the Bell & Howell Ultrasonic Rodent Repeller.
3. Repair any openings in your home where rodents can get in.
4. Ultrasound cannot penetrate anything solid; therefore avoid placing the unit behind large items in your home such as a couch or hutch.

One unit is capable of covering a typically sized room found in a family home. Most homes will require multiple units. Ultrasonic sound is highly directional and will be reflected by hard surfaces to fill a room with ultrasound. Soft surfaces such as drapery will absorb sound and reduce the area protected by the Bell & Howell Ultrasonic Rodent Repeller.

5. For optimal results, use with and in conjunction with normal control practices.

## WARNINGS:

ALL WARNINGS AND SAFETY INSTRUCTIONS SHOULD BE ADHERED TO

- Do not use this product near or around water. This unit should not be used near sinks, bathtubs, washing machines or in a damp basement. If cleaning is required, simply unplug the unit from its power source and use a damp cloth to wipe the unit housing. Dry off completely before plugging the unit back in.
- Do not block the ventilation openings on this unit. Place the unit where it can get proper ventilation.

- Do not place this unit near heat sources such as stoves or radiators.
- This unit should be connected directly to the power source. Do not use extension cords to operate this unit.
- Do not expose this product to rain or moisture. Do not submerge the unit in water or any other liquids.
- This product should be repaired by a qualified service technician if any of the following has occurred:
  - Power plug has been damaged.
  - Objects or liquid have fallen into the ventilation openings of the unit.
  - The unit does not appear to operate normally.
  - The unit has been dropped or the outer housing has been damaged.
- To avoid risk of electric shock or fire, do not open the unit or attempt to alter the unit in any way. No user serviceable parts are inside this unit.
- Keep these instructions for future reference.

NOTE: People with pacemakers or who use electronic devices that can be effected by an ultrasonic sound wave should consult their physician(s) before using this product. Failure to follow these instructions or heed these warnings can result in serious personal injury or death.

This unit should not be used on common wall areas or near property lines.
