Brominating tablets when used, as directed, are effective as a spa water sanitizer and disinfectant.

DIRECTIONS FOR USE:

Weight per tablet: xx g

WARNING: Direct tablet contact may cause bleaching of vinyl, acrylic or synthetic spa surfaces. Automatic feeding devices employing these tablets must be totally free from traces of other spa sanitizers to avoid the probability of an explosion.

1. Maintain recommended daily levels as determined by testing kit.

Free available bromine: 3.0 – 5.0 ppm

pH: 7.2 – 7.8

Total alkalinity: 100 – 150 ppm

Calcium hardness: 100 – 200 ppm

2. If using an automatic feeding device, fill the chamber(s) with tablets and adjust flow rate according to manufacturer's recommendations to maintain proper bromine residual. Adding tablets to the spa's skimmer basket is an alternative bromine feed method. Daily usage should approximate 5 g of SPA PURE BROMINE PUCKS per 1,000 L of spa water.

NOTE: Heavy spa usage and higher temperatures may require higher usage rates to maintain proper bromine residuals.

3. Periodic superchlorination of spa water is recommended. Follow label instructions of superchlorination product being employed.
4. Persistent foam formation, turbid or malodorous water are indicators of inadequate sanitizer levels. To correct such conditions, superchlorinate spa water by adding superchlorination product. Maintain circulation at least 30 minutes and wait 4 hours before using.
5. For proper sanitation, spa must be completely drained periodically. The number of days between COMPLETE SPA DRAINAGE is equal to the volume of spa water in litres, divided by 10 times the maximum number of daily spa users. Refill spa with water and repeat DIRECTIONS FOR USE. Maximum spa water usage temperature is 40 °C. Duration in spa water, at 40 °C, should not exceed 15 minutes.

PRECAUTIONS:

KEEP OUT OF REACH OF CHILDREN. Corrosive. Causes eye damage and skin burns. Skin exposure to dust may cause allergic skin reaction in some individuals. **DO NOT** get in eyes, on skin or on clothing. Harmful or fatal if swallowed. **DO NOT** swallow. Dust may be harmful or fatal if inhaled. **DO NOT** breathe dust. Strong oxidizing agent. May cause fire or explosion if contaminated. Dangerous gas formed when mixed with acid. Do not mix with any other chemical. Keep container closed and store in a cool, dry location. It is recommended to wear rubber gloves and goggles when handling the product.

DISPOSAL:

Do not reuse empty container. Wrap and dispose of empty container with household garbage. For information on disposal of unused, unwanted product, contact the manufacturer or the Provincial Regulatory Agency. Contact the manufacturer and the Provincial Regulatory Agency in case of a spill and for clean-up of spills.

FIRST AID:

If swallowed: Call a poison control centre or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control centre or doctor. Do not give anything by mouth to an unconscious person. **If on skin or clothing:** Take off contaminated clothing. Rinse skin immediately with plenty of water for 15–20 minutes. Call a poison

control centre or doctor for treatment advice. **If inhaled:** Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible. Call a poison control centre or doctor for further treatment advice. **If in eyes:** Hold eye open and rinse slowly and gently with water for 15–20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control centre or doctor for treatment advice. Take container, label or product name and Pest Control Product Registration Number with you when seeking medical attention. **If irritation or other adverse effects develop:** Wash with soap and water immediately. Seek medical attention if symptoms persist.

TOXICOLOGICAL INFORMATION:

Treat symptomatically. This product is corrosive to skin and eyes and may produce a sensitization response or allergic reaction in some individuals.

ENVIRONMENTAL HAZARDS:

This product is toxic to fish. Do not discharge into lakes, streams, ponds or public waters.
