Only to be used by individuals holding an appropriate pesticide applicator certificate or license recognized by the provincial/territorial pesticide regulatory agency where the application occurs.

- Aerosol insecticide for preflight spraying of cabin passenger areas, lockers, toilets, flight deck and crew rest areas.
- For use in aircraft cabins only.

## PRECAUTIONS

**KEEP OUT OF REACH OF CHILDREN.** Causes eye irritation. DO NOT get in eyes. May irritate skin. Avoid contact with skin. Potential skin sensitizer.

Wear long-sleeved shirt, long pants, goggles, chemical resistant gloves and shoes plus socks during application and inspection.

The product is not to be applied by the flight cabin crew, such as flight attendants.

DO NOT apply when passengers, officers/inspectors and crew (maintenance, flight etc) are present in the aircraft.

DO NOT allow passengers, officers/inspectors or crew (maintenance, flight etc) to re-enter the treated aircraft until the air circulation system is started.

Only for use on aircraft with the destination of Australia or New Zealand.

Do not spray directly on exposed food, food preparation areas or food utensils.

Do not use this product in or on electrical equipment due to the possibility of shock hazard.

## DIRECTIONS FOR USE

**For use inside aircraft prior to embarkation of passengers.** For Further instructions please see leaflet.

**FIRST AID:** Take container, label or product name and Pest Control Product Registration Number with you when seeking medical attention. If any exposure occurs, call a poison control center or doctor for treatment advice. Please refer to leaflet for further first aid instructions.

## Aircraft Insecticide

### PRECAUTIONS

KEEP OUT OF REACH OF CHILDREN. Causes eye irritation. DO NOT get in eyes. May irritate skin. Avoid contact with skin. Potential skin sensitizer.

Wear long-sleeved shirt, long pants, goggles, chemical resistant gloves and shoes plus socks during application and inspection.

The product is not to be applied by the flight cabin crew, such as flight attendants.

DO NOT apply when passengers, officers/inspectors and crew (maintenance, flight etc.) are present in the aircraft.

DO NOT allow passengers, officers/inspectors or crew (maintenance, flight etc.) to re-enter the treated aircraft until the air circulation system is started.

Only for use on aircraft with the destination of Australia or New Zealand.

Remove contaminated clothing and wash before reuse. Wash thoroughly with soap and water after handling. Do not contaminate food, feed, cooking utensils or drinking water. Do not spray directly on exposed food, food preparation areas or food utensils.

Do not use this product in or on electrical equipment due to the possibility of shock hazard.

### TOXICOLOGICAL INFORMATION: Treat symptomatically.

#### FIRST AID

Take container, label or product name and Pest Control Product Registration Number with you when seeking medical attention.

If any exposure occurs, call a poison control centre or doctor for treatment advice.

If swallowed: Call poison control centre or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the poison control centre or doctor. Do not give anything by mouth to an unconscious person.

If inhaled: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible.

If on skin or clothing: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes.

If in eye: Hold eye open and rinse slowly and gently with water for 15-20 minutes.

Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.

## DIRECTIONS FOR USE

**For use inside aircraft prior to embarkation of passengers:** To kill mosquitoes that may have entered the aircraft cabin. Suitable for use in B747, B777, B787. The treatment is to be carried out at the last overseas airport before departure to Australia or New Zealand. The treatment must take place after catering has been loaded and prior to the commencement of passengers boarding. Spraying must be conducted in the absence of passengers, crew, and officers/inspectors. The aircraft must be fully catered and the service door closed. One main entry door per level may remain open to facilitate operational requirements. During disinsection and for a period of five minutes after completion of the spray, the aircraft's air-conditioning must be switched off. Recirculation fans may be left on if essential to the operation of the aircraft but set at the lowest flow rate. Overhead and sidewall lockers are to be open during the spraying. Spraying to be directed towards the open overhead lockers and ceiling whilst walking along the aisle at the rate of not more than one step or one row of seats per second. Spray all galleys, including those on lower levels and lift access. Spray all toilets and coat lockers for two seconds each. Spray all crew rest areas and the flight deck for three seconds each. Applicator must ensure to direct their spray away from aircraft equipment. Any non-compliance in procedures should be reported to the biosecurity agencies at the airport of destination as soon as possible.

B747: Use 4 x 100g cans as above

B777: Use 3 x 100 g cans as above

B787: Use 3 x 100 g cans as above

**NOTE:** All cans used for cabin pre-embarkation spraying must be kept for inspection and removal by the Quarantine officer on board the aircraft at arrival at the first port of entry into Australia and New Zealand.

**STORAGE:** To prevent contamination store this product away from food. Pressurized container. Do not store near heat or open flame. Store in cool dry area, away from children. Protect from sunlight and do not expose to temperatures above 50° C. Do not puncture or incinerate container after use. Do not spray on a naked flame or any incandescent materials.

**DISPOSAL:** Dispose of used can by putting in garbage or recycling. For information on disposal of unused, unwanted product, contact the manufacturer or the provincial regulatory agency. Contact the manufacturer and the provincial regulatory agency in case of a spill, and for clean-up of spills.

**NOTICE TO USER:** This pest control product is to be used only in accordance with the directions on the label. It is an offence under the PEST CONTROL PRODUCTS ACT to use this product in a way that is inconsistent with the directions on the label.
