Green Way Liquid Ant and Roach Killer Refill incorporates boron (in the form of disodium octaborate tetrahydrate) in a special food bait which is highly attractive to ants, carpenter ants and cockroaches. Ants and carpenter ants pick up the bait and take it to their nests to feed the colony. Cockroaches will feed directly on the bait and die, but will not share the bait. The boron works slowly and sufficient bait should be made available for at least 14 days of continuous feeding. The ants and carpenter ants will return to their nests after consuming the bait and will feed their young and the queen, destroying the colony. Repeat placement of the bait until satisfactory control has been achieved.

Do not use sprays, foggers or any chemicals or cleaners near the bait containers or placements. This may contaminate the bait and cause the insects to cease feeding.

For control of ants, carpenter ants and cockroaches, use indoors or outdoors near homes, apartments, condominiums, schools, hospitals, restaurants, grocery stores, food processing plants, boats, cruise ships, institutional and commercial buildings, nursing homes, hotels and warehouse.

DIRECTIONS FOR USE:

Green Way Liquid Ant and Roach Killer Refill may be used in devices that provide entry to ants, carpenter ants and cockroaches, but protect the bait from exposure to humans, domestic animals and the elements. The bait can be used to refill ant and cockroach bait stations sold with the bait or in ant and cockroach bait stations designed for the addition of bait (Ant Café, Antopia, KM AntPro, Ant Café RTU (Ready To Use) or other similar bait stations).

Green Way Liquid Ant and Roach Killer Refill must be used at full strength for control of cockroaches or carpenter ants. For other ant species, the volume of available bait may be increased by dilution with water or other food grade liquid 1:1 to make bait containing 0.5% active ingredient.

Indoors: Place bait stations 1.5-3.0 metres apart where ants, carpenter ants or cockroaches are numerous. Refill bait stations as needed. Place stations adjacent to food cabinets, sinks, stoves, refrigerators, food storage areas, attics, garages, basements, storage areas and closets. Place on exterior windowsills and in doorways to help prevent entry of ants, carpenter ants or cockroaches. Some bait stations may be designed to be affixed to a wall or placed on a flat surface. When using bait stations, wash hands thoroughly before handling to remove any odours that may be repellent to ants, carpenter ants or cockroaches, i.e. tobacco, garlic, chemicals/cleaners.

Outdoors: Place bait stations near where ants enter dwellings, and near ant-hills in lawns or gardens. For best results place stations in shaded areas or create shade for the bait station. Avoid placing bait station where it will receive direct sunlight whenever possible.

Antopia Bait Station

Green Way Liquid Ant and Roach Killer Refill for use around structures- The number of bait stations to use will vary with the type of ant and the size of the colony. For initial placement- Place one bait station every 15 metres (50 feet) around the structure to be treated. If any of the bait stations is emptied in less than a week, double the initial placement. Replace baits as needed till feeding activity ceases.

PRECAUTIONS: Apply/use only in areas inaccessible to children and pets. Do not apply as a broadcast application. **KEEP OUT OF REACH OF CHILDREN AND DOMESTIC ANIMALS.** Avoid contamination of water, foodstuffs and utensils. Wash after use. Wear long pants, long-sleeved shirt, chemical resistant coveralls, chemical resistant gloves when mixing, loading and applying boron.

FIRST AID:

IF SWALLOWED: Call a poison control centre or doctor immediately for treatment advice.

Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control centre or doctor. Do not give anything by mouth to an unconscious person.

IF ON SKIN/CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control centre or doctor for treatment advice.

IF IN EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control centre or doctor for treatment advice.

IF INHALED: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth, if possible.

Take the container label or product name and Pest Control Product Registration Number with you when seeking medical attention.

TOXICOLOGICAL INFORMATION: Treat symptomatically.

DISPOSAL:

1. Thoroughly rinse the empty container. Spread rinsings on soil surface around ant hills.
2. Follow provincial instruction for any required additional cleaning of the container prior to its disposal.
3. Make the container unsuitable for further use.
4. Dispose of the container in accordance with provincial requirements.
5. For information on disposal of unused, unwanted product, contact the manufacturer or the provincial regulatory agency. Contact the manufacturer and the provincial regulatory agency in case of a spill, and for clean-up of spills.

NOTICE TO USER: This pest control product is to be used only in accordance with the directions on the label. It is an offence under the *Pest Control Products Act* to use this product in a way that is inconsistent with the directions on the label. The user assumes the risk to persons or property that arises from any such use of this product.
