This package uses XX% less plastic than our similar-sized pails

Scented Antimicrobial IGA® Clumping Litter for Multiple Cats is created from a blend of Canadian clays. Scented Antimicrobial IGA® Clumping Litter for Multiple Cats clumps on contact with liquid or solid waste stopping ammonia odors.

Scented Antimicrobial IGA® Clumping Litter for Multiple Cats contains a Moisture-Activated Scenting for an extra fresh scent as the litter box is used. Scented Antimicrobial IGA® Clumping Litter for Multiple Cats controls the growth of odor-causing bacteria and resists microbial odour development in the litter.

DIRECTIONS FOR USE:

1. Fill a clean, dry litter box with approximately 6 - 8 cm (2 - 3 inches) of Scented Antimicrobial IGA® Clumping Litter for Multiple Cats.
2. Remove pet waste daily with a slotted scoop.
3. Add fresh Scented Antimicrobial IGA® Clumping Litter for Multiple Cats to litter box as required to keep litter box comfortably full.
4. Completely empty and wash litter box once a month or as required.

DISPOSAL:

Dispose of clumps or used and unused cat litter and packaging in accordance with local regulations.

PRECAUTIONS:

Pregnant or nursing women and people with a suppressed immune system should note that a parasite found in cat feces can cause toxoplasmosis. They should exercise caution and consult a physician before handling a litter box. Always wash hands thoroughly after preparing or cleaning the litter box. For further information, consult your local public health office.

WARNING: Encouraging your cat to use an indoor litter box, or properly disposing of outdoor cat feces, is beneficial to overall water quality. Do not flush cat litter in toilets or dispose of it outdoors in gutters or storm drains, or any other waste water system. Do not use this product as a traction aid. It becomes slippery when wet. Keep the litter away from food preparation.

TOXICOLOGICAL INFORMATION:

Treat Symptomatically
