DIRECTIONS FOR USE:

FOR USE IN AND AROUND: Homes, Apartments and Mobile Homes.

ATTRACTS AND KILLS COMMON SWEET-EATING ANTS.

USING TERRO® MULTI-SURFACE LIQUID ANT BAITS:

TERRO® MULTI-SURFACE LIQUID ANT BAITS is [a] [an] [ready] [easy]-to-use, pre-filled, liquid ant bait station. Ants will enter the station, feed and return to the nest where they will pass on the bait to the rest of the colony. Included [removable] adhesive strips allow for [discreet], multi-surface application. Bait stations may be applied to indoor vertical surfaces, [including cabinet sides and interiors, cabinet toe kicks, baseboards, walls], cabinet overhangs or placed directly on floors or counters.]

USE INSTRUCTIONS:

Product Application:

1. For [adhesive] [discreet] [placement] [applications], apply included [removable] adhesive strip to either side of station between adhesive strip placement guides. Press and hold [adhesive] strip firmly to station for 10 seconds [to ensure proper adhesion]. [For non-adhesive application, skip to step 3.]
2. Remove [remaining] [wall side] [adhesive] strip [liner] [paper backing].
3. Hold bait station firmly in one hand with bait pack tab facing up. [Break][Twist][Snap] off the bait pack tab being careful not to spill bait.
4. Apply/place bait stations close to where ants are [traveling] [present]. For adhesive [applications] [placements], [carefully] press and hold station firmly against surface for 10 seconds [to ensure proper adhesion]. Ants will enter the bait station through the hole created by removing the bait pack tab.
5. Place additional bait stations anywhere ants [may enter] [are present in] your home. [For best results, use (all) (number) bait stations to ensure sufficient supply for the ants.]
6. Monitor [placements] [bait stations] regularly for activity but do not interfere with the ants or baits.
7. Replace bait stations [with new baits] when bait is depleted [until ants are controlled].
8. [Once ants are controlled, replace bait stations every month to keep ants from returning].

Product Removal (for adhesive applications):

1. Grasp bait station and [twist] [turn] [gently] [slowly] to remove [station] from adhesive strip [being careful not to spill any remaining bait.]
2. Pull [free] [loose] adhesive strip tab [in direction of tab] [to stretch strip] until strip is freed from [application] surface.

CONTROLLING ANTS: At first, ants will come to the bait in large numbers, but then will gradually disappear. TERRO® Multi-surface Liquid Ant Baits allows worker ants to live long enough to carry the bait back to the colony. The entire colony is usually killed within 2 weeks. The key to obtaining control is to monitor the placements and ensure there is always a fresh supply of TERRO® Multi-surface Liquid Ant Baits at each placement.

PRECAUTIONS: KEEP OUT OF REACH OF CHILDREN. Avoid contamination of food, water and kitchen utensils. Wash after use. Apply/use only in areas inaccessible to children and pets.

FIRST AID: If swallowed: Call a poison control centre or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control centre or doctor. Do not give anything by mouth to an unconscious person. Take container, label or product name and Pest Control Product Registration Number with you when seeking medical attention.

TOXICOLOGICAL INFORMATION: Treat symptomatically.

DISPOSAL: Do not reuse empty container. Wrap in newspaper and dispose of empty container in household garbage.
