NOTICE TO USER

This pest control product is to be used only in accordance with the directions on the label. It is an offence under the *Pest Control Products Act* to use this product in a way that is inconsistent with the directions on the label.

FIRST AID:

If in eyes, hold eye open and rinse slowly and gently with water for 15–20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.

Call a poison control centre or doctor for treatment advice. If on skin or clothing, take off contaminated clothing. Rinse skin immediately with plenty of water for 15–20 minutes. Call a poison control centre or doctor for treatment advice. If swallowed, call a poison control centre or doctor immediately for treatment advice. Do not induce vomiting unless told to do so by a poison control centre or doctor. Do not give ANY liquid to the person. Do not give anything by mouth to an unconscious person. If inhaled, move person to fresh air. If person is not breathing, call 911 or an ambulance. Then give artificial respiration, preferably by mouth-to-mouth, if possible. Call a poison control centre or doctor for further treatment advice.

Take container, label or product name and Pest Control Product Registration Number with you when seeking medical attention.

TOXICOLOGICAL INFORMATION:

This product contains petroleum distillates. Vomiting may cause aspiration pneumonia. Treat symptomatically. Skin exposure may cause transient sensations (tingling, burning, itching, numbness). Other symptoms of exposure could include respiratory effects (such as cough, respiratory irritation, or shortness of breath), nausea, headache or dizziness.

PRECAUTIONS:

KEEP OUT OF REACH OF CHILDREN. Contents under pressure. **DO NOT** place in hot water or near radiators, stoves or other sources of heat or store at temperatures over 50°C. Avoid breathing spray mist. Avoid contact with skin, eyes and clothing. Harmful if swallowed, inhaled or absorbed through skin. Not for use on humans. Wash after use. Cover or remove aquaria and remove pets for 1 hour. Wash contaminated clothing before reuse. **DO NOT** contaminate feed, food, litter or food-handling equipment. **DO NOT** use in areas where beekeeping equipment or supplies are stored, or where milk is stored or processed. Keep from freezing. **DO NOT** remain in treated areas after application.

ENVIRONMENTAL PRECAUTIONS

Toxic to aquatic organisms. Toxic to bees. Avoid application around blooming plants. If applications must be made during the blooming period, restrict applications to evening when most bees are not foraging. Toxic to beneficial arthropods (which may include predatory and parasitic insects, spiders, and mites). Minimize exposure to non-target areas.

DIRECTIONS FOR USE: (Container can be held in any position while spraying, even upside down.) **DO NOT** USE on humans. [For (contact), (residual), (surface), (crack & crevice) & (spot) applications). Within the specified use location, to enhance effectiveness of this product, apply directly to the listed pests where possible. (The application of this product to vinyl and aluminum siding (particularly lightly colored, aged, weathered or otherwise damaged) may result in staining, bleaching or discoloration. Factors such as extreme heat and direct sunlight can promote damage. Always pre-test a small inconspicuous area to be treated, for colour fastness and staining. Evaluate 30

2023-3307
2024-01-22

minutes after test application for potential staining. Regardless of the test results, **DO NOT** apply to vinyl or aluminum siding while exposed to direct sunlight or during the heat of the day.) For all indoor and outdoor uses, treatment must only be repeated after 7 days if pest problem persists or reoccurs. When applied indoors, good sanitary practices should be maintained to prevent re-infestation.

FOR INDOOR USE AT BUILDINGS, FOR LIMITED OUTDOOR USE ON THE EXTERIOR SURFACES OF LISTED BUILDINGS AND FOR OUTDOOR USE AROUND LISTED BUILDINGS AND AROUND PORCHES

Use Limitations

- **DO NOT** apply when people or pets are present.
- **DO NOT** allow people or pets to enter treated areas until sprays have settled or dried.
- **DO NOT** apply to surfaces that may come into contact with food/feed. Cover or remove all food/feed. Cover all food/feed processing surfaces, equipment and utensils or thoroughly wash them following treatment. Any food/feed accidentally contaminated with spray solution must be discarded.
- When applied as a surface spray: **DO NOT** apply to overhead areas or in confined spaces (e.g., indoors in attics, crawlspaces, small storage rooms, closets; and outdoors to eaves, soffits). **DO NOT** allow spray to drip or allow drift onto non-target surfaces.
- When applied indoors: Ventilate treated areas after application by opening windows and doors or using fans, where required, to aid in the circulation of air.
- When applied outdoors: **DO NOT** apply to any body of water. **DO NOT** contaminate irrigation or drinking water supplies or aquatic habitats by cleaning of equipment or disposal of wastes. Avoid application of this product when winds are gusty.

How to Apply

DO NOT APPLY AS AN INDOOR BROADCAST TREATMENT. Apply as an indoor or outdoor space spray; indoor crack and crevice, perimeter, spot or furniture (pet bedding, mattresses, box springs, bed frames, bookcases, chests and drawers only) treatment; or outdoor broadcast treatment only. Remove all objects before treatment of furniture, luggage, closets or other areas where clothing, toys, towels, and other items are stored. Treated furniture must be dry before replacing stored items. Indoor space application is a suspension of fine droplets (0.1 to 100 µm) in the air within an indoor space. Crack and crevice is an application directly into narrow openings on the surface of the structure. It does not include the treatment of exposed surfaces. Narrow openings typically occur at expansion joints, utility entry points and along baseboards and mouldings. Perimeter application is less than 0.3 m wide along the edges of a room to baseboards, wall-floor and ceiling-wall joints, and around doorways or windows. Spot application is localized to a surface area not more than 0.2 m². Spots are not to be adjoining. The combined area of spots is not to exceed 10% of the total surface area of a room (indoors) or total surface area treated (outdoors). Broadcast application is to large outdoor structural surfaces (roofs, walls, doors, windows and foundations). Furniture treatment: broadcast application covers large areas of the entire surface of items; crack and crevice treatments are applications to junction points on items; spot application is up to 10% of the surface of the item; and tuft and/or seam treatment (mattresses only) is to the junction of two or more pieces of fabric and any decorative trim (e.g., buttons).

2023-3307

2024-01-22

INDOOR USE:

SPACE APPLICATION

To kill House flies, Hornets, Mosquitoes, and Wasps : Close all windows and doors and shut off all ventilating systems and sources of ignition before treatment. While holding can upright at arm's length, spray upward in sweeping motion to all parts of the room, especially ceiling, upper corners of the room, windows and other light sources. Keep spray at least 1 m from interior walls, fabrics and furniture. Begin application at far side of the room and work backwards toward exit. **DO NOT** exceed 0.57 g/m³ of room space (0.23 seconds/m³) per average sized room (30 m³). Vacate the treated area and keep windows and doors closed for 15 minutes, then ventilate thoroughly before re-entry. Following ventilation, clean up dead insects.

SURFACE APPLICATION

DO NOT exceed 50.0 g/m² (20 seconds/m²) for all indoor surface applications.

To kill Ants, Clover mites, Cockroaches, Crickets, Silverfish and Spiders: Treat cracks and crevices in walls; along and behind baseboards; walls behind and floors beneath appliances (e.g., refrigerators and stoves) and furniture (e.g., cabinets and storage units); around sinks, drains and pipes; localized areas around garbage cans; and other building elements where listed insects are found. For silverfish, also spray the cracks and crevices in bookcases. Remove all objects before treatment of bookcases where books, clothing, toys, towels and other items are stored. Treated bookcases must be dry before replacing stored items. For ants and clover mites, also spray points of entry (e.g., around windows and doors). For spiders, also spray localized areas of floors and floor coverings.

To kill Carpet beetles: Spray edges of carpeting and underneath carpets and rugs. Make localized applications to floors and baseboards.

To kill Bed bugs: With the exception of clothes which are treated for clothes moths, **DO NOT** use on items which can be laundered (e.g., pillows, bedding, toys, etc.). Remove bedding before treating mattress. Spray mattress, particularly around tufts and seams. Take bed apart and spray the bed frame, springs and all joints. Treated mattress must be dry before replacing laundered bedding. Following ventilation, clean up dead insects.

To kill Clothes moths: Remove all objects before treatment of chests and drawers where clothing are stored. Air clothing for several hours in sunlight, if possible. Spray thoroughly in empty chests and drawers, directing the spray into cracks, crevices and joints. Treated storage furniture must be dry before replacing stored items. After airing, lightly spray infested clothing, holding can at least 1 m from fabric to avoid staining. Only apply to clothing which can be laundered. Treated clothing must be laundered prior to wearing.

To kill Fleas and Ticks: **DO NOT** apply to furniture (with the exception of pet bedding), mattresses, linens, toys or clothing. Apply to cracks and crevices in walls; along and behind baseboards, window and door frames; and localized areas of floors and floor coverings. Pet bedding may be entirely treated with this product or replaced with clean, fresh bedding after other listed areas are treated. **DO NOT** spray furniture or carpets that people regularly contact. **DO NOT SPRAY PETS WITH THIS PRODUCT.** Only treat pets with products specifically registered for use on that type of pet. For effective flea and tick control indoors, clean any area used by the pet. Cleaning the areas includes vacuuming floors, carpets, furniture, etc. (discard vacuum bag after use) and washing the pet's bedding, living quarters, and surrounding area.

OUTDOOR USE:

2023-3307
2024-01-22

To kill House flies, Mosquitoes, Hornets, Wasps: *For use on the exterior surfaces of listed buildings:* Apply to structural surfaces of homes, garages, storage buildings, and barns where insects are congregating, including around windows & doors and other structural surfaces of listed buildings. **DO NOT** exceed 50.0 g/m² (20 seconds/m²). **DO NOT** treat soil, turf or other plants adjacent to the treatment site. *For use around listed buildings and porches:* While holding can upright at arm's length, direct the mist upward in sweeping motion around listed buildings and porches. **DO NOT** exceed 12.5 g/m² (5 seconds/m²). **DO NOT** apply in areas where plants are grown for food or feed (e.g., vegetables, fruit, herbs).

FOR USE ON INDOOR ORNAMENTAL HOUSEPLANTS

To kill Aphids, Spider mites, and Whiteflies on the following houseplants: Asters, Azaleas, Begonias, Carnations, Camellias, Chrysanthemums, Dahlias, Delphiniums, Geraniums, Gladiolas, Roses, and Snapdragons: **DO NOT** apply to houseplants that are used for food or feed (e.g., herbs). **DO NOT** use on greenhouse plants. When listed pests are a problem, spray to thoroughly cover all foliage, including upper and lower leaf surfaces until damp. **DO NOT** wet plants to the point of runoff or drip. When spraying, hold can 30 to 45 cm from plants to avoid wetting the foliage. **DO NOT** exceed 6.0 g/m² (2.4 seconds/m²). Use with caution on new growth and on tender young plants and foliage. Test on one or two leaves to determine safety.

FOR USE ON OUTDOOR ORNAMENTAL PLANTS

Use Limitations

- **DO NOT** apply to plants grown for food or feed (e.g., fruits, vegetables, herbs).
- **DO NOT** apply to any body of water.
- **DO NOT** contaminate irrigation or drinking water supplies or aquatic habitats by cleaning of equipment or disposal of wastes.
- Avoid application of this product when winds are gusty.

To kill Aphids, Spider mites, White flies on the following plants: Asters, Azaleas, Begonias, Carnations, Camellias, Chrysanthemums, Dahlias, Delphiniums, Geraniums, Gladiolas, Roses, and Snapdragons: When listed pests are a problem, spray to thoroughly cover all foliage, including upper and lower leaf surfaces until damp. **DO NOT** wet plants to the point of runoff or drip. When spraying, hold can 30 to 45 cm from plants to avoid wetting the foliage. **DO NOT** exceed 6.0 g/m² (2.4 seconds/m²). Apply in early morning or evening – not in direct sunlight. Spray only when air is still and temperature is below 32°C. Use with caution on new growth and on tender young plants and foliage. Test on one or two leaves to determine safety.

FOR USE ON HORSES ONLY

Use Limitations

- **DO NOT** use on newborn or nursing foals.
- Use on show, race, work or pleasure horses only. **DO NOT** use on horses intended for slaughter.
- **DO NOT** soak skin. **DO NOT** exceed 60 g per animal per treatment.
- **DO NOT** treat eyes/eyelids and mucous membranes (e.g., nose, mouth, genitals).
- **DO NOT** cover horses immediately after treating/after treatment.
- **DO NOT** apply to back of horse prior to saddling.
- **DO NOT** use on sick animals or animals under drug or pesticide treatment. Before use on pregnant animals, consult a veterinarian.
- Avoid contact with treated horse until dried.
- Discontinue use if horse develops irritation after treatment with this product.

2023-3307

2024-01-22

- Use **ONLY** in a well-ventilated area, preferably outdoors.
- **DO NOT** apply when people are present.
- **DO NOT** allow product to contact non-target surfaces.
- **DO NOT** apply more than once per day. Treatment must only be repeated if pest problem persists or reoccurs. A veterinarian should be consulted when pest infestation continues to be a problem on the horse.

To kill Mosquitoes, Biting midges, Black flies, Stable flies, and Horn flies: Shake well before using. This product is to be applied directly to the horse as a spray or as a wipe-on. Prior to treatment, thoroughly brush horse to remove excess dirt and dust and remove mucous secretions from face of the horse. Extremely dirty horses should be shampooed, rinsed and allowed to dry before treatment. After application, brush thoroughly to bring out bright sheen on the coat.

Spray Method: Apply a light, uniform spray to thoroughly coat the hair of the horse, while brushing lightly against lay of the hair. **DO NOT** wet horse's skin. Target areas of the horse commonly attacked by listed pests such as the legs, flanks and topline of the horse. **DO NOT** apply as a spray to the face of horse. When applying to the face of horse, use the Wipe-On Method as described below.

Wipe-On Method: Use this method to apply to the face and other sensitive areas to avoid application to eyes and mucous membranes (e.g., nose, mouth, genitals). To use as a wipe-on, moisten (not to the point of dripping) a clean, soft cloth/sponge/mitt with K-G MULTI-PURPOSE INSECT KILLER RTU SPRAY. Thoroughly rub the moistened cloth/sponge/mitt over the area of hair of the horse to be protected. It is best to apply by rubbing against the hair growth. Give special attention to the legs, shoulders, shanks, neck and facial areas (where flies most often are seen on the horse).

STORAGE:

Store this product away from food or feed.

DISPOSAL:

When container is empty, press valve to release pressure. Do not puncture or incinerate. Wrap empty container and dispose in household garbage. Unused or partially used products should be disposed at provincially or municipally designated hazardous waste disposal sites.

This container may be recycled in communities where (steel) (plastic) aerosol can recycling is available. Before offering for recycling, empty the can by following the procedure described above.
