**DIRECTIONS FOR USE:** SHAKE CAN WELL BEFORE USING. This product is designed for applying into cracks, crevices, or tight areas that are difficult to reach. The foaming action of this formula completely fills tight crevices leaving an insecticidal active residue. To enhance effectiveness of this product, apply directly to ants where possible. Remove protective cap and insert the extension tube into the spray nozzle before using. For all uses on this label, **DO NOT** exceed 7 seconds per m<sup>2</sup>. Treatment must only be repeated after 7 days if pest problem persists or reoccurs.

**USE LIMITATIONS FOR ALL USES:** **DO NOT** apply when people or pets are present. **DO NOT** allow people or pets to enter treated areas until sprays have dried. **DO NOT** contaminate food/feed. **DO NOT** apply to surfaces that may come into contact with food/feed. Cover or remove all food/feed. Cover all food/feed processing surfaces, equipment and utensils or thoroughly wash following treatment. Any food/feed accidentally contaminated with spray solution must be discarded. **DO NOT** allow spray to drip or allow drift onto non-target surfaces. **DO NOT** apply to people, animals or sources of electricity. **DO NOT** apply to overhead areas or in confined spaces (e.g. indoors in attics, crawlspaces, small storage rooms, closets; and outdoors to eaves and soffits). When applied indoors: Ventilate treated areas after application by opening windows and doors or using fans, where required, to aid in the circulation of air. When applied outdoors: **DO NOT** apply in areas where plants are grown for food or feed (e.g., vegetables, fruit, herbs). **DO NOT** treat soil, turf or other plants adjacent to the treatment site. **DO NOT** apply to any body of water. **DO NOT** contaminate irrigation or drinking water supplies or aquatic habitats by cleaning of equipment or disposal of wastes. Avoid application of this product when winds are gusty.

**INDOOR USE AT BUILDINGS:** Apply as an indoor crack and crevice treatment only. **DO NOT** APPLY AS A SPACE SPRAY, PERIMETER OR BROADCAST TREATMENT. Crack and crevice is an application directly into narrow openings on the surface of the structure. It does not include the treatment of exposed surfaces. Narrow openings typically occur at expansion joints, utility entry points and along baseboards and mouldings. Good sanitary practices should be maintained to prevent re-infestation. **DO NOT** spray product in areas where it can be mopped away.

**To control ants:** Thoroughly treat indoor building surfaces including cracks and crevices in walls, floors and ceilings, along and behind baseboards; around water pipes and tanks; walls behind and floors beneath appliances (e.g., refrigerators and stoves) and furniture (e.g., drawers, cabinets and storage units); around sinks, drains and pipes; around interior foundations; garbage cans; localized areas of floors and floor coverings; and points of entry (e.g., around windows and doors). **DO NOT** apply to furniture, mattresses, linens, toys or clothing. Provide adequate ventilation after indoor use. **KEEP PETS AND CHILDREN AWAY FROM SURFACE UNTIL DRY.** **DO NOT** use in areas where food is processed, handled, served or stored.

**OUTDOOR USE ON ANT HILLS:** **To control ants:** Gently insert the extension tube as far as possible into cracks and crevices in driveways, patios, sidewalks, or interlocking brick where ants hide. Depress trigger and allow foam to fill the area. Stop spraying when the foam comes back out the crack or crevice. For best results, treat all cracks and crevices in the area where ants are found.

**PRECAUTIONS:** **KEEP OUT OF REACH OF CHILDREN.** Harmful if swallowed, inhaled or absorbed through skin. Avoid contact with eyes, skin, or clothing. May cause skin and/or eye irritation. Contents under pressure. **DO NOT** place in hot water or near radiators, stove or other sources of heat.

**ENVIRONMENTAL PRECAUTIONS:** Toxic to aquatic organisms, birds, bees and beneficial arthropods (which may include predatory and parasitic insects, spiders and mites). Minimize exposure to non-target areas. Avoid application around blooming plants. If applications must be made during the blooming period, restrict applications to evening when most bees are not foraging.

**FIRST AID:** **If on skin or clothing,** take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control centre or doctor for treatment advice. **If in eyes,** hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control centre or doctor for treatment advice. **If swallowed,** call a poison control

centre or doctor immediately for treatment advice. Do not induce vomiting unless told to do so by a poison control centre or doctor. Do not give any liquid to the person. Do not give anything by mouth to an unconscious person. **If inhaled**, move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible. Call a poison control centre or doctor for further treatment advice. Take container, label or product name and Pest Control Product Registration Number with you when seeking medical attention.

**TOXICOLOGICAL INFORMATION:** Skin exposure may cause transient sensations (tingling, burning, itching, numbness). Other symptoms of exposure could include respiratory effects (such as cough, respiratory irritation, or shortness of breath), nausea, headache or dizziness. This product contains petroleum distillate. Vomiting may cause aspiration pneumonia. Treat symptomatically.

**STORAGE:** Store this product away from food or feed. **DO NOT** store at temperatures over 50° C.

**DISPOSAL:** When container is empty, press button to release all pressure. **DO NOT** reuse empty container. **DO NOT** throw into fire. Dispose in household garbage. Unused or partially used products should be disposed at provincially or municipally designated hazardous waste disposal sites.

**For additional product information or in case of emergency, spills or fire, call toll-free 1-800-268-2806. [www.wilsoncontrol.com](http://www.wilsoncontrol.com)**

*Water Based – Shake Well*

*Kills ants*

*The application to vinyl and aluminum siding (particularly lightly colored, aged, weathered or otherwise damaged) may result in staining, bleaching or discoloration. Factors such as extreme heat and direct sunlight can promote damage. Always pre-test a small inconspicuous area to be treated, for colour fastness and staining. Evaluate 30 minutes after test application for potential staining. Regardless of the test results, **DO NOT** apply to vinyl or aluminum siding while exposed to direct sunlight or during the heat of day. **DO NOT** apply to tapestries, wallpaper or similar materials that may stained.*
