

NW-CA-B

WOOD PRESERVATIVE- COMMERCIAL
For Industrial Use Only
Emulsifiable Concentrate

REGISTRATION NO. 33525 PEST CONTROL PRODUCTS ACT

DANGER

POISON

CORROSIVE TO EYES AND SKIN

**READ THE LABEL BEFORE USING
KEEP OUT OF REACH OF CHILDREN AND
PREVENT ACCESS BY UNAUTHORIZED PERSONNEL**

ACTIVE INGREDIENTS:

Copper, present as Copper monoethanolamine complexes..... 9.25%
Tebuconazole 0.37%

Net Contents: _____

Timber Specialties Limited
35 Crawford Crescent, P.O. Box 520
Campbellville, Ontario L0P 1B0
(905) 854-2244

DIRECTIONS FOR USE:

USE LIMITATIONS

For use as a heavy duty wood preservative in the treatment of industrial and non-industrial wood products for above ground, ground contact, fresh water contact or treatable members out of water but subject to salt water splash in the following categories:

Residential construction such as decks, patios, fencing, play structures, siding, plywood, sill plate, and/or Recreational applications such as walkways, boardwalks, landscaping, docks, gazebos, picnic tables and/or General Construction and commercial applications such as dimensional lumber, structural timbers, posts, decking, and/or Agriculture and Horticulture applications such as fencing, framing, building poles. Also, highway construction, lumber and timbers for bridges, bridge decking, hand rails, spacer blocks, and posts. Do not use to treat utility poles and pilings.

DO NOT apply this product in a way that will contact workers or bystanders, either directly or through drift. Only protected handlers may be in the area during application.

DO NOT contaminate irrigation or drinking water supplies or aquatic habitats by cleaning of equipment or disposal of wastes.

DO NOT apply this product directly to freshwater habitats (such as lakes, rivers, sloughs, ponds, prairie potholes, creeks, marshes, streams, reservoirs and wetlands), or estuarine/marine habitats.

DO NOT discharge effluent containing this product or the biocide produced into sewer systems, lakes, streams, ponds, estuaries, oceans or other waters unless the effluent has been detoxified by suitable means.

NW-CA-B is a copper azole wood preservative for use only in vacuum pressure impregnation of wood products, utilizing water solutions having active ingredient concentrations ranging from 0.3% to 3.0% by weight.

Treat the wood using the pressure treatment procedures consistent with the equipment being used and standard treatment practices. Treatment conditions must be calibrated to yield the retention levels found in the following table:

End Use	Target Retention (kg/m³)
Above Ground	1.7
Ground Contact	3.3
Ground Contact (severe decay hazard)	5.0

Treatment of wood products with this Copper Azole wood preservative provides wood with protection against termites, white rot, and brown rot.

Processes used to apply NW-CA-B shall leave no visible surface deposits on the wood. Visible surface deposits mean a surface residue or crystallization on the treated wood. Small isolated or infrequent spots of chemical on otherwise clean wood shall be allowed. Surface residues must be removed prior to the wood being shipped.

Drip aprons must be roofed, paved and drained to prevent dilution and loss of treatment solution. Store treated lumber on a roofed drip pad until dripping has ceased. Slope lumber on the drip pad to expedite drainage and to ensure that no puddles remain on the surface of the wood. All drippage from

treated wood should be captured and recycled in the plant process. Manage drippage and other related wastes to prevent release in the environment. DO NOT expose treated lumber to rains immediately after treatment. DO NOT float treated lumber in lakes, rivers, streams, or oceans. For further information on storage, handling and disposal of treated wood, contact the manufacturer of this product or the provincial regulatory agency.

PRECAUTIONS:

KEEP OUT OF REACH OF CHILDREN. DANGER. CORROSIVE TO EYES AND SKIN. May be fatal if absorbed through the skin, swallowed or inhaled. Do not get in eyes, on skin, or on clothing. Do not inhale sprays/mists. Wear full-face protection, chemical-resistant coveralls over long sleeved shirt and long pants, chemical-resistant gloves, socks and chemical resistant footwear when handling concentrate or dilute solution, when opening treating cylinder doors and during cleaning, maintenance and repair activities on storage vessels and treating cylinders. In addition, wear either a respirator with a NIOSH approved organic- vapour- removing cartridge with a prefilter approved for pesticides OR a NIOSH approved canister approved for pesticides when handling the concentrate, when handling the dilute solution if the area is not well ventilated, when opening treating cylinder doors and during cleaning, maintenance and repair activities on storage vessels or treating cylinders. Wear chemical resistant coveralls over long sleeved shirt and long pants, goggles or face shield and chemical resistant gloves when handling freshly treated wood.

Remove personal protective equipment immediately after handling this product. As soon as possible, wash thoroughly and change into clean clothing. Remove clothing/personal protective equipment immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing. Discard clothing and other absorbent material that have been drenched or heavily contaminated with the product's concentrate. Do not reuse them. For cleaning/maintaining personal protective equipment, use detergent and hot water. Change clothing daily. Keep and wash personal protective equipment separately from other laundry. Wash hands and face before eating, drinking, chewing gum, using tobacco or using the toilet. Wash the outside of gloves before removing.

FIRST AID:

IF SWALLOWED: Call a poison control centre or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control centre or doctor. Do not give anything by mouth to an unconscious person.

IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15–20 minutes. Call a poison control centre or doctor for treatment advice.

IF INHALED: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible. Call a poison control centre or doctor for further treatment advice.

IF IN EYES: Hold eye open and rinse slowly and gently with water for 15–20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control centre or doctor for treatment advice.

Take container, label or product name and Pest Control Product Registration Number with you when seeking medical attention.

TOXICOLOGICAL INFORMATION:

This product may cause upper respiratory tract irritation if inhaled. Treat symptomatically.

STORAGE:

Once the pressure treated wood has ceased dripping, it may be moved from the drip pad to the storage yard. Practices such as water diversion, paper wrap, cover, sheds, etc., should be considered as a means of reducing contamination of storm water run-off.

Do not contaminate water, food or feed by storage or disposal. Keep product in tightly closed container when not in use. Do not drop, roll or skid drum. Keep upright. Always replace cover. Store in a cool (< 25°C), dry, well-ventilated area away from heat or open flame.

DISPOSAL:

- Triple- or pressure-rinse the empty container. Add the rinsing to the treatment solution.
- Follow provincial instruction for any required additional cleaning of the container prior to its disposal.
- Make the empty container unsuitable for future use.
- Dispose of in accordance with provincial requirements.
- For information on the disposal of unused, unwanted product, contact the Manufacturer or the Provincial Regulatory Agency. Contact the manufacturer and the provincial regulatory agency in case of a spill, and for clean-up of spills.

DECONTAMINATION:

- Contain spilled material.
- Do not allow oxidizable or other incompatible materials to come into contact with spilled materials.
- DO NOT FLUSH INTO SURFACE WATERS.

ENVIRONMENTAL HAZARDS:

DO NOT BURN WOOD TREATED WITH NW-CA-B. This product is TOXIC to aquatic organisms.

NOTICE TO USER:

This pest control product is to be used only in accordance with the directions on the label. It is an offense under the *Pest Control Products Act* to use this product in a way that is inconsistent with the directions on the label.
