READ THE LABEL BEFORE USING

HARVEST TRENDS INC., 42 KING STREET, WEST, INGERSOLL, ONTARIO N5C 2J4

(519) 485-2150

PRECAUTIONS:

Keep out of reach of children. - Do not mix with any other chemical. - Dangerous gas formed when mixed with acid. - Avoid contact with skin and eyes. - Harmful if swallowed. - Keep container closed and store in a cool location. - Rinse container thoroughly before discarding. - To dispose of chemical, flush into sewer with large quantities of water.

FIRST AID:

If splashed in eyes or on skin, flush thoroughly with water for 15 minutes. For eye contact, get medical attention. If swallowed, give one or two glasses of milk and warm water. Call a Physician IMMEDIATELY. Keep patient warm.

STORAGE:

Keep container closed and store in a cool location. Use at once - stability maximum 6 months.

Do not store in trunk of car for extended periods of time.

AQUASAN is a high strength sodium hypochlorite solution which exhibits excellent algaecidal properties. Proper use of AQUASAN in conjunction with a regular maintenance program will give a sanitary pool, free of harmful micro-organisms.

DIRECTIONS FOR USE:

1. Maintain proper daily levels as determined by testing kit.

Chlorine:1.0	-	3.0	ppm
PH:7.2	_	7.8	
Total Alkalinity:100	-	120	ppm
Calcium Hardness:200	_	300	mqq

- 2. Superchlorinate pool water initially with 1 litre AQUASAN per 10,000 litres of pool water.
- 3. For best results superchlorinate at dusk.
- 4. Chlorinate daily to maintain proper chlorine residual with 250 millilitres of AQUASAN per 10,000 litres of pool water, or as needed.

NOTE: HOT weather, heavy pool usage, and rain may require higher dosage rates to maintain proper chlorine residuals.

- 5. Superchlorinate weekly with 1 litre AQUASAN per 10,000 litres when average daily temperature is 25 C 32 C. Otherwise, superchlorinate every other week.
- 6. For visible algae, superchlorinate with 2 litres per 10,000 litres of pool water. Heavy algae infestation may require dosages up to 3 L per 10,000 L. Wait at least 24 hours and vacuum pool when dead algae settles.
- 7. For wading pools, chlorinate daily to maintain chlorine residue of 3 5 ppm by adding 45 mL per 1,000 L of pool water, or as needed. NOTE: For outdoor pools, chlorine

residuals can be protected from destruction by sun's rays by addition of cyanuric acid (stabilizer).

8. For Commercial Laundry dilute concentrated solution with equal parts of Water and use 500 mL. per 50 Kg. of clothes.
