NOTICE TO BUYER: Seller's guarantee shall be limited to the terms set out on the label and subject thereto. The buyer assumes the risk to persons or property arising from the use or handling of this product and accepts the product on that condition.

GENERAL INFORMATION:

Apply INSECTA-D to interior surfaces, as described below, to reduce infestations of insects.

INSECTA-D may be applied with a brush (10cm band), or spray (10cm band), or as a crack and crevice application to control insects on non-food contact latex painted interior surface. Use as is, do not dilute. Stir well before use. Covers 15 square metres per litre.

Apply utilizing a coarse, low pressure spray (20 psi or less) as a crack and crevice application, or as a 10 cm band barrier application, at entranceways and where walls and floors meet. Dries quickly and rinses easily with water. Allow to dry for several days before washing. Wash brush, roller or spraying equipment thoroughly with soap and water after use. Contact between the insect and the treated surface is necessary, so any time the surface becomes covered with dust, or dirt, it should be washed with water in order to re-establish maximum possible contact.

INSECTA-D applied on exposed glass, glazed tile, metal or other non-porous surfaces may dry leaving a light film. Do not use on surfaces used for food preparation.

PRECAUTIONARY STATEMENTS  
HAZARDS TO HUMANS AND DOMESTIC ANIMALS

PRECAUTIONS: Harmful if swallowed or absorbed through the skin. Avoid breathing vapours while wet. Provide adequate ventilation of area during application. Avoid contact with eyes, skin and clothing. In case of contact, flush eyes or skin with plenty of water.

ENVIRONMENTAL AND PHYSICAL HAZARDS:

This product is toxic to fish, birds and other wildlife. Do not contaminate water by cleaning of equipment or disposal of waste. Do not apply directly to water. Apply this product only as specified on this label.

STORAGE: Store away from freezing temperatures.

DISPOSAL: Do not re-use empty container. Replace lid on container and dispose of in household garbage.

FIRST AID INSTRUCTIONS:

If swallowed, do not induce vomiting and call poison control centre and get medical attention immediately. Flush contaminated eyes and skin with water and get medical attention.

TOXICOLOGICAL INFORMATION: Contains a cholinesterase inhibitor and a solvent. Atropine is an antidote.
