DOMESTIC INSECTICIDE SPRAY

For the control of lice and their nits, bed bugs and clothes moths, on contact, found in clothes, bedding, mattresses and furniture. A complement to the treatment of pediculosis caused by lice.

DIRECTIONS FOR USE:

- To control lice and their nits (eggs) and bed bugs infesting clothing, bedding, mattresses and furniture, hold container 30 or 40 cm from infested surface and spray in short bursts. Wash or dry clean treated clothing before reuse. Let treated mattresses and furniture air dry for 4 hours before reuse. For bed bugs, also spray cracks, crevices, base boards and other possible hiding places around the room.
- For clothes moths, arrange clothing to be treated in a suitable enclosure (e.g. closet, chest) so that spray mist can circulate freely around them and spray over the clothing. Keep closed for one hour after treatment.

PRECAUTIONS:

- KEEP OUT OF REACH OF CHILDREN.
- Toxic to fish. Remove fish bowls from the room to be treated.
- Contents under pressure. Do not place in hot water or near radiators, stoves or other sources of heat.
- Do not puncture or incinerate. Do not store at temperature over 50 degrees Celsius (120 degrees Fahrenheit).
- Do not use in presence of open flame or spark.
- Avoid inhalation and contact with eyes and skin.
- Do not contaminate food, feed, water, beverages, utensils, food preparation surfaces or food storage areas with this product.
- Not for use on humans or animals.

FIRST AID:

- In case of eye contact, flush with running water.
- If on skin, wash with soap and water.
- If swallowed, do not induce vomiting, call physician immediately.
- If irritation develops, contact physician.

- Take container, label or product name and Pest Control Product Registration Number with you when seeking medical attention.

DISPOSAL:

- Wrap on and dispose of empty can with household garbage.
