GENERAL INFORMATION

LORSBAN 25% WP Slurry Seed Treatment Insecticide is a wettable powder formulation designed for slurry treatment of seed prior to planting to protect the germinating seeds and seedlings against injury by seed-corn maggots. LORSBAN 25% WP Slurry Seed Treatment Insecticide may be applied in combination with an approved fungicide if protection of the seed from fungi, which may cause disease or rot, is also desired. Seed treated with LORSBAN 25% WP Slurry Seed Treatment Insecticide may be stored for up to two years without loss of insecticidal effectiveness.

USE AND DOSAGE RECOMMENDATIONS

Lima beans, wax beans, green beans, peas, corn (for control of seed-corn maggots): Use 250 grams of LORSBAN 25% WP Slurry Seed Treatment Insecticide per 100 kg of seed applying the seed as a slurry treatment prior to planting.

SLURRY TREATMENT

Disperse 250 grams of LORSBAN 25% WP Slurry Seed Treatment Insecticide in 750 mL to 1.25 L water solution containing 0.5% by weight of an acceptable sticking agent. Use 0.75 to 1.25 L of solution for each 100 kg of seed to be treated. If a fungicide is used, it should be added to the slurry in accordance with its label directions. Mix the slurry with the seed using a rotating blender or other suitable mixing equipment that will ensure each seed is uniformly coated. DO NOT MIX THE SEED AND PRODUCT WITH BARE HANDS. Dry the seed immediately after treatment. If seed is bagged or packaged when wet, heat may develop, which could result in reduced germination. Seed treated with LORSBAN 25% WP Slurry Seed Treatment Insecticide must be coloured with a suitable dye to indicate the presence of a pesticide chemical.

PRECAUTIONS

KEEP OUT OF REACH OF CHILDREN IN CASE OF ACCIDENT CALL A DOCTOR -
MAY BE FATAL IF SWALLOWED

May be Absorbed Through Skin - May Be Irritating to the Eyes and Skin - Avoid Contact with Eyes and Skin - Do Not Wear Contaminated Clothing - Wash Thoroughly after Handling - Avoid Breathing Vapours - Keep Away from Food, Feedstuffs and Water Supplies.

USE PRECAUTIONS

Do not use treated seed for human consumption, as feed for livestock or poultry or for oil purposes. Label treated seed as follows: DO NOT USE FOR FOOD, FEED OR OIL. THE SEED IS TREATED WITH CHLORPYRIFOS, AN ORGANOPHOSPHATE INSECTICIDE.

This product is toxic to fish, birds and wildlife. Do not contaminate water by cleaning of equipment or disposal of wastes.

Promptly crush empty bags and bury them with any unused pesticides and blender rinse water away from water supplies. Do not burn bags.

FIRST AID

If swallowed, induce vomiting. Flush Contaminated Eyes and Skin with Plenty of Water and for Eyes Get Medical Attention.

TOXICOLOGICAL INFORMATION

LORSBAN 25% WP Slurry Seed Treatment Insecticide is a cholinesterase inhibitor. Treat symptomatically. Atropine, by injection only, is an antidote.

NOTICE TO USER: This control product is to be used only in accordance with the directions on this label. It is an offence under the PEST CONTROL PRODUCTS ACT to use a control product under unsafe conditions.

NOTICE TO BUYER - Seller's guarantee shall be limited to the terms set out on the label and subject thereto the buyer assumes the risk to persons or property arising from the use or handling of this product and accepts the product on that condition.
