For use as a crack and crevice treatment to control insects
listed on front panel.

DIRECTIONS: "SHAKE CONTAINER WELL". Use only with equipment capable of delivering a pin stream. Insert the "application wand" into the spray nozzle before using. This product is designed for injecting into cracks, crevices or tight areas that are difficult to reach where insects may be hiding living and breeding.

CRAWLING INSECTS: Spray directly into cracks and crevices particularly behind baseboards, door frames, bookcases, moist areas, openings around pipes and sinks, around windows, structural cracks and crevices and meter boxes where insects like to go, and where the insecticide won't be mopped away. The foaming action of this formula completely fills tight crevices leaving a long-term insecticidally active residue. Spray into hard to reach places, behind and under refrigerators, washers, under sinks, between cabinets, under counters, etc.

KEEP PETS AND CHILDREN AWAY UNTIL RESIDUE IS DRY.

PRECAUTIONS: KEEP OUT OF REACH OF CHILDREN. Contents under pressure. Do not place in hot water or near radiators, stove or other sources of heat, or store at temperatures over 50 deg C. Do not spray near open flame or spark. Harmful if swallowed, inhaled or absorbed through the skin. Avoid contact with eyes, skin or clothing. DO NOT USE ON HUMANS, PLANTS, ANIMALS, FOOD STUFF, FOOD UTENSILS, FISHBOWLS OR ANIMAL FEED AREAS. DO NOT USE AS A SPACE SPRAY. DO NOT CONTAMINATE FOODSTUFF. Do not use in any area where food may be exposed. Do not use in bulk food storage areas. Do not use in cupboards where food or cooking utensils are stored. In homes or dwellings, remove or cover all exposed food and cooking utensils before spraying. Thoroughly wash all surfaces that might contact food before re-use with potable water. In food processing plants and food service establishments, treat only when plant is not in operation. Remove or cover all food packaging materials and utensils and cover all food processing surfaces before spraying. After treatment, wash all surfaces that may contact food and rinse thoroughly with potable water before resuming operations.

FIRST AID: In case of contact with the skin, wash with soap and water. If in eyes, flush with water. If irritation develops and persists contact a physician. If swallowed, induce vomiting and contact a physician or Poison Control Centre immediately.

TOXICOLOGICAL INFORMATION: Chlorpyrifos is a cholinesterase inhibitor. Atropine is antidotal.

DISPOSAL: When container is empty, press button to release all pressure. Dispose of empty container in accordance with

provincial requirements. For information on the disposal of unused, unwanted product and the cleanup of spills, contact the provincial regulatory agency or the manufacturer.

NOTICE TO USER:

This control product is to be used only in accordance with the directions on this label. It is an offence under the Pest Control Products Act to use a control product under unsafe conditions.

NOTICE TO BUYER:

Seller's guarantee shall be limited to the terms set out on the label and subject thereto. The buyer assumes the risk to persons or property arising from the use or handling of this product and accepts the product on that condition.

This label transcript service is offered by the Pest Management Regulatory Agency to provide efficient searching for label information. This service and this information do not replace the official hard-copy label. The PMRA does not provide any guarantee or assurance that the information obtained through this service is accurate, current or correct, and is therefore not liable for any loss resulting, directly or indirectly, from reliance upon this service.
