DIRECTIONS FOR USE:

SHAKE WELL BEFORE USING. To be used for treatment of non-combat clothing and mosquito netting only. Make all applications outdoors. Do not apply to skin. **Do not treat clothing while it is being worn. DO NOT TREAT HEAD GEAR OR UNDERGARMENTS. Permethrin Arthropod Repellent is not to be used in conjunction with Insect/Arthropod Repellent Protective Treatment for Military Battle Dress Uniforms.**

For protection from biting arthropods (e.g. ticks, mosquitoes, sand flies, black flies) select an outdoor area protected from the wind and set out clothing. Hold can at a distance of 15 to 20 cm from the item to be treated, and spray outer surfaces of non-combat military clothing with a slow sweeping motion to lightly moisten the surface of the fabric (i.e., enough to cause a slight colour change). Treat the entire surface of the non-combat military clothing and allow items to dry for at least 2 hours (clothing will take longer to dry under humid conditions) before wearing the treated non-military combat clothing.

As a general rule, approximately $\frac{3}{4}$ of a container will treat one complete set of field clothing (i.e., long-sleeve shirt, pants and socks).

Treat mosquito netting as for clothing. Set out netting (DO NOT TREAT NETTING THAT IS IN USE)

and apply spray with a slow sweeping motion until netting is wetted. Treat the entire surface of the netting.

Reapply after six weeks of wear or after every sixth laundering, whichever is sooner. Under appropriate military direction, dry cleaning can be used to remove permethrin from treated clothing or mosquito nets.

To achieve maximum protection against biting insects, this item needs to be used with other insect discipline measures, for example with a topical repellent applied to exposed skin areas.

PRECAUTIONS:

Human Hazard: Harmful if inhaled. Avoid breathing vapours or contact with face, eyes, or skin. May cause eye and skin reactions. **Do Not Apply to Skin. For Treatment of Non-Combat Military Clothing Only.** Discontinue use if any skin reaction should occur. Potential skin sensitizer. Individuals with asthma or a predisposition to develop allergies (such as individuals with known sensitivity to synthetic pyrethrins or naturally occurring pyrethrins) should consult a physician prior to using this product. Keep away from food, mess gear, and water supplies. Thoroughly wash mess gear if contaminated with this product. Wash thoroughly after handling wet treated uniform and before eating and smoking. Contents under pressure. Do not puncture or incinerate. Container may explode if heated. Do not allow temperatures of container to exceed 54°C.

FIRST AID:

If on skin: Wash affected areas with soap and water. If in eyes: Flush eyes with plenty of water. Contact physician if irritation persists. If inhaled: Remove person to well ventilated area. Apply artificial respiration if indicated.

DISPOSAL: When container is empty, press valve to release all pressure. Wrap empty container and discard in trash. In field situations bury the container.

NOTICE TO USER: This control product is to be used only in accordance with the directions on this label. It is an offense under the Pest Control Products Act to use a control product under unsafe conditions.
