DIRECTIONS: STANDARD 1% SODIUM HYPOCHLORITE SOLUTION

1. Using a 70 litre vessel (preferably large plastic or stainless steel) approximately half full of luke warm water, add 1 kg of Stericlene and stir for a few minutes. Add

water to 70 litre level and stir for a few more minutes until thoroughly mixed. Allow sediment to settle until the solution is clear. This is a solution of Sodium Hypochlorite containing approximately 1% available chlorine.

FOR LAUNDRY USE: Use 2 litres of standard 1% Sodium Hypochlorite solution for each 45 kg (dry weight) of load in the washer. In addition to bleaching, germicidal and deodorant benefits are obtained.

GENERAL SUPPLY SOLUTION: To prepare a supply solution containing 1% Calcium Hypochlorite, dissolve 1 kg of Stericlene - in 70 litres of water. 1 litre of this solution in 12000 litres of water is equivalent to a dosage of 1 p.p.m. in available chlorine.

DIRECTIONS: SWIMMING POOL SANITATION

Amount required depends on bathing load and other factors. Sufficient supply solution should be used to maintain proper residual chlorine according to provincial and local regulations (usually 0.6 to 1.0 p.p.m.)

SUGGESTED DAILY DOSAGE

Pool Capacity In Litres	Quantity STER Suggested (Daily)	Pool Capacity In Litres	Quantity STER Suggested (Daily)
10,000 L	15 g	100,000 L	150 g
20,000 L	30 g	200,000 L	300 g
50,000 L	75 g	300,000 L	450 g
		500,000 L	750 g

WATER AND SEWAGE TREATMENT: A 1% Calcium Hypochlorite solution is a convenient strength for auxiliary or continuous supply of water works of sewage plants. The chlorine demand varies according to seasons, degree of contamination, etc. Sufficient supply solution should be used to maintain proper residual chlorine according to provincial and local regulations. REPLACE LID WHEN NOT IN USE.

DANGEROUS gas formed when mixed with acid. Avoid contact with skin and eyes and do not mix with a toilet bowl cleaner, rust remover, household ammonia or acids.

FIRST AID TREATMENT: If splashed in eyes or on skin, flush thoroughly with water and if swallowed, give one or two glasses of milk or warm water. CALL a physician immediately. Keep

patient warm.
