DIRECTIONS FOR USE
SHAKE WELL BEFORE USING.

HOW TO PRIME AND CARE FOR YOUR SPRAYER:

1. After shaking product well, remove cap from container and replace with sprayer hose and cap assembly. Tighten securely.
2. Turn sprayer nozzle one half turn counter-clockwise. Hold the sprayer below the level of the container and prime by pumping trigger 10-15 times until product is dispensed. Adjust nozzle to fine spray or jet stream as needed.
3. To store, turn nozzle to "OFF" position and store with sprayer above level of liquid in container to prevent leakage.

INDOOR APPLICATION: For spot application only. Do not use as a space spray or broadcast application indoors.

SURFACE SPRAYING: KILLS COCKROACHES, SOWBUGS, ANTS, SILVERFISH, FIREBRATS, SPIDERS, CRICKETS, RICE WEEVILS AND RED FLOWER BEETLES. Direct the spray into hiding places, cracks and crevices and behind shelves and drawers. For silverfish, spray bookcases. For ants spray trails, nests and points of entry.

TO CONTROL CARPET BEETLES: Spray edges of carpeting and under carpeting and rugs for approximately 10 seconds duration. Make localized application to floor and baseboards. Spray directly into cracks, crevices and infested areas of shelving. Repeat treatment as needed.

TO CONTROL FLEAS AND TICKS (ADULTS AND LARVAE): Thoroughly spray infested areas, pet beds, resting quarters, nearby cracks and crevices, along and behind baseboards, moldings, window and doorframes. Apply to infested floor areas as a spot spray only, not as a space or broadcast spray. Fresh bedding should be placed in animal quarters following treatment. Repeat treatment as needed. Allow to dry thoroughly before allowing pets to contact treatment areas.

TO CONTROL CLOTHES MOTHS: Remove any infested articles from storage, brush thoroughly and air for several hours in sunlight, if possible. Apply spray liberally to empty chests, closets, bureaus and other storages directing the spray into cracks, joints and crevices. After airing, infested articles may be treated lightly, keeping nozzle at least 90 centimetres (three feet) from fabric to avoid staining. Allow articles to dry before handling and launder clothes before wearing.

OUTDOOR APPLICATION: To help control ants, fleas, and ticks in outdoor activity areas, treat a band of vegetation and leaf litter 1.8 to 3 metres (6-10 feet) wide and adjacent to activity areas, especially where dense vegetation occurs

TO KILL GARDEN INSECTS: WHITEFLIES AND APHIDS. May be used on plants such as African violets, asters, begonias, camellias, carnations, chrysanthemums, dahlias, delphiniums, dogwoods, English ivy, euonymus, fuchsia, geraniums, Crassula, grape vines, Kentia palms laurels, marigolds, rhododendrons, roses, rubber plants, snapdragons, stock, wandering Jews, and zinnias as a multi-purpose spray in small gardens and for spot treatments of insect infestations to prevent spreading in large garden areas. For use on roses, dahlias, asters and other ornamentals.

Effective when used as directed against APHIDS, PAVEMENT ANTS AND WHITEFLIES.

PRECAUTIONS

KEEP OUT OF REACH OF CHILDREN. Wash thoroughly after handling and before smoking or eating. Avoid contamination of food, feed, cooking utensils or drinking water. Remove pets and birds and cover fish aquarium before surface applications. After use and at least one (1) hour drying time, wash all surfaces that may contact food. Do not use on humans. Do not allow people or pets to contact treated areas until surfaces are dry.

This product is extremely toxic to fish and aquatic invertebrates. Do not apply directly to lakes, rivers, streams, ponds, tidal marshes and estuaries. Do not contaminate the above-mentioned aquatic areas through spray drift, cleaning of equipment or disposal of waste.

This pesticide is highly toxic to bees exposed to direct treatment or to residues remaining on the treated area. Do not apply this product or allow drift when bees are actively visiting the treatment area. Applications should be timed to provide the maximum interval between treatment and the next period of bee activity.

FIRST AID

If In Eyes: Rinse with clean water for 15 minutes. If On Skin: Wash off with soap and water. If irritation persists, seek medical attention. If swallowed, give patient 1 to 2 glasses of water and induce vomiting by inserting finger into mouth and touch the back of throat. Contact a doctor or Poison Control Centre immediately. Never give anything by mouth to an unconscious person. Take container, label or product name and Pest Control Product Registration Number with you when seeking medical attention.

DISPOSAL

Do not reuse container. Wrap in several layers of newspaper and discard in trash.

NOTICE TO BUYER: Seller's guarantee shall be limited to the terms set out on the label and, subject thereto, the buyer assumes the risk to persons or property arising from the use or handling of this product and accepts the product on that condition.
