'ROUND THE CLOCK KILLING  
FOR 30 DAYS

**Raid Ant Terminals** work continuously, 24 hours a day, seven days a week to rid your home of ants for approximately 30 days depending on number of ants. For best results, use all baits at one time. To keep ants from returning replace baits as necessary.

**DIRECTIONS:** Baits are supplied with peel-off tape to secure to surfaces and to reduce exposure hazard to children and pets. Avoid wallpaper or painted surfaces that may be damaged when replacing baits.

**FOR INDOOR USE:** For thorough ant control, use all baits at one time or as many as needed. Place right by ant trails, household entry points and areas where ants are numerous. Special attention should be given to kitchen and other food preparation areas. Do not place directly over food preparation surfaces or in food storage cupboards.

**FOR OUTDOOR USE:** Place baits near ant hills and around building foundations, under porches and shrubbery or throughout vegetable, fruit or flower gardens, wherever ants are seen.

Replace baits every 30 days or as needed to keep ants from returning. For immediate kill and enhanced control, use baits with Raid Ant, Roach & Earwig Killer and Raid Liquid Ant Killer.

**DISPOSAL:** Wrap container and place in garbage.

**PRECAUTIONS:** Place bait stations in areas inaccessible to children and pets. Do not remove bait from terminal.

**FIRST AID:** If bait station or its contents are accidentally swallowed, seek medical attention. Contains bendiocarb - a carbamate cholinesterase inhibitor. Atropine is antidotal.

### **TURN AND PULL UP TO OPEN**

This is how Ant Terminals work.

Ants enter

Eat bait

Crawl away to die
