PURSUE!

DISINFECTANT CLEANER

DIRECTIONS FOR USE

Apply PURSUE! Disinfectant Cleaner with a cloth, sponge, or mop to hard, washable surfaces such as sinks, exteriors of toilet bowls and toilet seats, bed frames, tables, chairs,

counters, walls, and floors. For heavily soiled areas, a preliminary cleaning may be required.

For Schools, Institutional and Industrial Uses: Add 10 mL PURSUE! per litre of water. At 10 mL per litre use-level, PURSUE! Disinfectant Cleaner delivers excellent cleaning and is germicidal. It is effective against *Staphylococcus aureus*, *Salmonella choleraesius*, *Escherichia coli*, and *Trichophyton interdigitale*, the athlete's foot fungus. Germicidal performance against the first three organisms has been confirmed by the AOAC Use-Dilution Test. Fungicidal performance was determined against *T. interdigitale* by the AOAC Fungicidal Test.

For Hospital, Nursing Home, Disinfectant Use: Add 20 mL PURSUE! per litre of water. At 20 mL per litre use-level, PURSUE! Disinfectant Cleaner is effective against *Pseudomonas aeruginosa*, *Staphylococcus aureus*, *Salmonella choleraesius*, *Escherichia coli*, and pathogenic fungi. The same AOAC tests used above were used to confirm suitable performance for hospitals.

At 20 mL per litre the broad spectrum effectiveness of PURSUE! Disinfectant Cleaner is shown by its germicidal action against the following additional organisms:

<i>Brevibacterium ammoniagenes</i>	<i>Klebsiella pneumoniae</i>
<i>Enterobacter aerogenes</i>	<i>Salmonella</i>
<i>Schottmuelleri</i>	<i>Proteus mirabilis</i>
<i>Streptococcus faecalis</i>	<i>Streptococcus pyogenes</i>
<i>Shigella dysenteriae</i>	

Virucide: at 20 mL per litre use-level, PURSUE! Disinfectant Cleaner is virucidal against Herpes Simplex (a member of the virus family that causes infectious mononucleosis), Vaccinia (representative of the pox viruses), adenovirus Type 5 (a causative virus in respiratory diseases), and Influenza A2 as represented by the strains commonly called the Hong Kong Flu and London Flu Virus, on inanimate environmental surfaces.

For Sanitizing: Add 5 mL PURSUE! per litre of water. Use PURSUE! Disinfectant Cleaner for sanitizing and cleaning of utensils, equipment and other hard surfaces. When sanitizing food processing equipment, utensils and food contact surfaces, a potable water rinse is required.

For Mold and Mildew Control: Add 10 mL PURSUE! per litre of water. PURSUE! Disinfectant Cleaner will effectively inhibit the growth of mold and mildew and the odours caused by them

when applied to hard non-porous surfaces (as indicated in general instructions above). Allow to dry on surface and repeat when mildew growth returns.

PURSUE! DISINFECTANT CLEANER
DEODORIZER - SANITIZER - GERMICIDE -
FUNGICIDE - VIRUCIDE - MILDEWSTAT
FOR HOSPITAL, INSTITUTIONAL AND INDUSTRIAL USE

PURSUE! Disinfectant Cleaner is a truly effective formulation of biodegradable surfactants and powerful disinfecting ingredients. While it cleans, its hard surface disinfecting action will reduce the hazard of cross-infection, which is of major concern in schools, hospitals, institutions and industry. Kills Staphylococcus and Streptococcus bacteria, athlete's foot fungus, flu viruses, and many other infectious microorganisms when used as directed. PURSUE! Disinfectant Cleaner is an extremely effective one-step sanitizer. It cleans and sanitizes in waters up to 800 ppm hardness. This hard water tolerance is in excess of most potable waters and will insure complete sanitizing action when used as directed.

At 20 mL per litre of water, PURSUE! Disinfectant Cleaner will deodorize bathrooms, garbage storage areas, and other areas where bacterial growth can cause malodors.

PRECAUTIONS:

KEEP OUT OF REACH OF CHILDREN. May cause severe eye irritation or eye damage. Causes skin irritation. Do not get in eyes, on skin, or on clothing. Harmful if swallowed. Avoid contamination of food.

FIRST AID

In case of contact, immediately flush eyes or skin with plenty of water for at least 15 minutes. For eyes, call a physician. Remove and wash all contaminated clothing before reuse. If swallowed, drink promptly a large quantity of water. Call a physician immediately.

NOTICE TO USER:

This control product is to be used only in accordance with the directions on the label. It is an offence under the Pest Control Products Act to use a control product under unsafe conditions.
