Notification Change

## ELIMINATES ODOURS AND CHANGING!

**Odours and changing are problems of the past!** The superior absorption and binding capability of Natural Select™ Plus allows for complete removal of liquid and solid waste and their associated odours.

**Easily remove even liquid waste!** Unlike ordinary cat litters, when exposed to liquid waste, Natural Select™ Plus granules bond tightly together and won't break apart during removal or when cats scratch in the box. **Do not flush waste down the toilet or any waste system.**

**One package lasts for up to 6 months.** Simply replenish the litter that is thrown away. Unused Natural Select™ Plus stays in the box and keeps working!

### **DIRECTIONS FOR USE:**

1. Pour enough Natural Select™ Plus into a clean litter box to cover the bottom at least 5 cm (2 inches) deep. If you are using Natural Select™ Plus for the first time, you will need approximately 1/3 of this package to fill a regular size litter box.
2. Each day remove all urine balls and solid waste from litter box with a sifting scoop. Dispose of waste in trash receptacle.
3. If scooped daily, the remaining clean litter will not need to be discarded. Simply add fresh Natural Select™ Plus as needed to maintain at least a 5 cm (2-inch) depth.

The Anti-Bacterial Agent Eliminates Odour Causing Bacteria!

Odours are caused by bacteria. Natural Select™ Plus with an anti-bacterial agent controls the bacteria thus eliminating odours.

**DISPOSAL:** Dispose of used or unused product with household garbage. **DO NOT FLUSH WASTE DOWN THE TOILET OR ANY OTHER WASTE SYSTEM.**

**PRECAUTIONS: KEEP OUT OF REACH OF CHILDREN.** Always wash hands thoroughly after preparing or cleaning the litter box. Pregnant and nursing women and people with a suppressed immune system should note that a parasite found in cat feces can cause toxoplasmosis. They should exercise caution and consult a physician before handling a litter box. For further information, consult your local public health office. Do not use this product as a traction aid because product becomes slippery and slick when wet.
