DIRECTIONS: SHAKE WELL BEFORE USING. Apply with the hand trigger sprayer attached. Depress button top and adjust nozzle to suitable spray pattern. Use outdoors, in greenhouses or indoors on houseplants. Use throughout the growing season or as a pre-harvest treatment when other insecticides are prohibited due to residue restrictions. Spray to thoroughly cover upper and lower leaf surfaces. Repeat treatments weekly or as needed to control infestation. May be used up to one day before harvest. Use with caution on tender young plants and foliage. Test on one or two leaves to determine safety. Apply in early morning or evening - not in direct sunlight. Spray only when air is still and temperature is below 32° C. Insects must be contacted directly to be killed, as there is no residual effect.
