MAIN STREET, DRAYTON, ONTARIO
N0G 1P0

FOR AGRICULTURE USE -

Dairy farms - clean equipment prior to sanitizing with Drayton DCI. For utensils and equipment rinse with 2 ml per litre (1/3 oz per gallon) 200 ppm solution for approximately 2 minutes.

For sanitizing pipelines a 2 ml per litre (1/3 oz per gallon) 200 ppm solution of Drayton DCI for 2 minutes.

No potable water rinse required if solution does not exceed 200 ppm. Potable water rinse is required to a concentration exceeding 200 ppm available chlorine.

NOTICE TO USER: This product is to be used only in accordance with the direction on this label. It is an offence under the Pest Control Products Act to use a control product under unsafe conditions.

CAUTION: KEEP OUT OF THE REACH OF CHILDREN, NEVER MIX WITH OTHER POOL OR HOUSEHOLD CHEMICALS. Do not mix with toilet bowl cleaner or rust remover. Avoid contact with skin and eyes. May be fatal or harmful if swallowed. Store only in original container tightly closed in a cool, dry place away from heat and sunlight, in an upright position. Guarantee: Sodium Hypochlorite 10.8%

FOR SWIMMING POOLS -

For wading pools add 5 mL for every 250 l of water. Recommended for use in all types of pools - vinyl lined, concrete and fibre glass. Before adding Drayton DCI, the pH should be tested and adjusted within 7.2 to 7.6. Add muriatic acid if pH is high. Add soda ash if pH is low. Drayton DCI should be added daily to maintain 0.6 to 1.0 parts per million available chlorine. The use of a test kit is recommended, as the air temperature and the number of people in the pool will affect the amount of Drayton DCI required. Under average conditions, Drayton DCI should be added daily to pool water according to the following chlorination guide.

Pool Capacity [litres]	Daily Charge [litres]
10,000	125 - 250 ml
20,000	325 - 625 ml
50,000	625 ml - 1.25 L
100,000	1.25 - 2.50 L
250,000	3.25 - 6.25 L

NOTE: First application should be double the indicated amount. Every three weeks, add one week's charge of Mall DCI in one application to ensure proper control of algae, slime and fungus. Avoid using pool until chlorine residual drops below 2.0 ppm (approximately 24 hours).

FIRST AID TREATMENT: Contains Sodium Hypochlorite. If splashed in eyes or on skin, flush thoroughly with water. If swallowed, give one or two glasses of milk or warm water. Call physician

immediately. Keep patient warm.
