200 g (7 oz)

Multi Purpose Insect Control is designed to take advantage of mineral deposits of diatoms which have been found useful in reducing crawling insect pest population in and around the private home or apartment. The patented manufacturing process of this product contains two food-grade additives of which one attracts the crawling insects while other is a digestive ingredient. When applied directly, crawling insects are usually killed within 48 hours from cutting action. This fine powder will not stain.

DIRECTIONS: Multi Purpose Insect Control will remain effective in controlling many crawling domestic household and garden pests such as: ants, caterpillars, cockroaches, crickets, earwigs, fleas, potato beetles, silverfish, slugs, sowbugs, etc. Direct application to insect is preferred. Apply by lightly coating or dusting area where insect pests are found or hide such as cracks & crevices, under cabinets, etc. Product remains effective as

long as it is present. Use as powder indoors or out. For best results, use in areas where dust application cannot be affected by heavy rains or high winds. For longer control outdoors, use as a wettable powder with water around foundations, shrubs, flower beds, gardens, etc.

HOW IT WORKS:

Diatomaceous Earth (diatoms, sharp microscopic particles). Insects are killed from internal and external cutting action that also causes dehydration of insect pests.

Two Food-Grade Additives. One ingredient attracts insect pests into the powder (external action); the other attracts insect pests to eat the powder (internal action). Kiln-Baked together into a patented powder from which can be used both dry or wet!

DOSAGE: Dry - Lightly coat desired area. Suggested rate of 50g of Insect Control per 10 sq. meters. (1 oz. Insect Control per 65 sq. ft.). Wet - Apply to point of wetness 75g of Insect Control in 1L water per 10 sq. meters. (2 1/2 of Insect Control in 1 qt. water per 65 sq. ft.).

PRECAUTIONS: KEEP OUT OF REACH OF CHILDREN. Avoid breathing dust. Do not use as a space spray. Avoid contact with eyes.

FIRST AID: If in eyes, rinse with cold water. If irritation persists, seek medical attention.

DISPOSAL: Dispose of empty container in household garbage. Do not reuse container.
