Made in U.S.A.

READ THE LABEL BEFORE USING

SPECIAL FORMULA: BAKER'S ALL WEATHER "BAIT BLOCKS" Rodenticide contains a select, choice combination of taste-tempting (to *Rattus norvegicus* and *Rattus rattus*). Ingredients blended with a high-potency anticoagulant into a uniform, standard, ready-to-use

rodenticide. No prebaiting required,...just use as directed.

#### DIRECTIONS:

For control in Sanitary and combination Sanitary and Storm Sewers, secure a BAIT BLOCK(R) to one end of wire and attach other end of wire to bottom step of manhole ladder allowing just enough wire for BAIT BLOCK(R) to rest on manhole benching.

In sewers with no benching at manhole, secure BAIT BLOCK (R) to one end of wire and attach the other end of wire to manhole ladder keeping BAIT BLOCK(R) above water level. A board may be placed across sewer resting on opposite steps and BAIT BLOCK (R) ( secured to manhole ladder by wire) can be placed on board for the rodents to feed on.

FOR CONTROL IN STORM SEWERS: BAIT BLOCKS (R) can be suspended from sewer grates, with wire attached to grate so that the BAIT BLOCKS (R) remain a few inches above normal water level.

#### NOTE:

In all installations, BAIT BLOCKS (R) should be secured with wire so that they are not carried or floated away. Where Rat infestations appear extremely heavy, use 2 or more BAIT BLOCKS (R) in each manhole.

#### KEEP TREATED AREAS WELL SUPPLIED:

Continuous feeding from 5 to 14 days should give control. BAKER'S ALL WEATHER "BAIT BLOCKS" (R) should be available to rodents until complete lack of feeding is noticed. Never allow the treated areas to remain empty for over 48 hours.

#### PRECAUTIONS:

##### KEEP OUT OF REACH OF CHILDREN

Keep away from pets, domestic animals and wildlife. Do not expose treated bait in areas accessible to children, dogs, domestic animals, and wildlife except when enclosed within a tamper-resistant bait box. Keep away from feed or food stuffs. Do not get in eyes, on skin or on clothing. Wash arms, hands and face with soap and water after handling and before eating or smoking.

#### FIRST AID:

If in eyes, flush with water for 15 minutes. If on skin, wash

with soap and water. If swallowed, give patient one or two glasses of water and induce vomiting by touching back of the throat with a finger or blunt object; repeat until vomit fluid is clear. Do not give anything by mouth to an unconscious person. Contact a physician or poison control centre immediately. If accidentally swallowed, call a physician or poison control centre immediately.

TOXICOLOGICAL INFORMATION:

If ingested, administration of Vitamin K1 in the form of intravenous, intramuscular or subcutaneous injections, or by oral ingestion are suggested remedial treatments for anticoagulant poisoning. The severity of the case measured by establishing prolonged prothrombin times (P.T.) will determine appropriate therapy. Monitoring P.T. will indicate the necessity of repeated treatments.

ENVIRONMENTAL HAZARDS:

Keep out of lakes, streams or ponds.

DISPOSAL: Do not reuse empty container. Dispose of unused or spoiled bait in accordance with local requirements. Follow provincial instructions for any required cleaning of the container prior to its disposal. Make the empty container unsuitable for further use. Dispose of the container in accordance with provincial requirements. For more information on the disposal of unused, unwanted product and the cleanup of spills, contact the Provincial Regulatory Agency or the Manufacturer.

RODENT DISPOSAL: Dispose of dead rodents in garbage or by burying.

NOTICE TO USER:

This control product is to be used only in accordance with the directions on this label. It is an offence under the Pest Control Products Act to use a control product under unsafe conditions.
