DIRECTIONS: FOR OUTDOOR USE: Wasp and hornet nests - Garden Club (TM) Wasp & Hornet Killer releases a fine spray that allows treatment of nests from at least one metre away. Shake well before using. Treat at night or late evening when insects are inside the nest. Apply spray with 2-3 second bursts directly into the nest opening so that the liquid contacts the inside of the nest. If unable to spray directly into the nest, a heavy

residual spray around and into openings where insects gain entrance will eventually eliminate the pests. Repeat as necessary.

PRECAUTIONS: KEEP OUT OF REACH OF CHILDREN. Contents under pressure. Do not place near source of heat. Do not puncture or throw container into fire or store at temperatures over 50'C. Do not spray near open flame or spark, or while smoking. Do not use on humans, animals or plants. Do not use indoors as a space spray. May be harmful if swallowed, inhaled or absorbed through the skin. Avoid breathing spray mist. Avoid contact with eyes, skin, and clothing. Do not contaminate animal feed or exposed food. Wash with soap and water after using.

FIRST AID:

If in eyes or on skin, flush with plenty of water for 15 minutes. If irritation persists obtain medical attention.

If swallowed, give patient one or two glasses of water and induce vomiting by touching back of throat with a finger or blunt object. Contact a physician or poison control centre immediately.

TOXICOLOGICAL INFORMATION: Garden Club (TM) Wasp and Hornet Killer spray contains a cholinesterase inhibitor. Atropine is antidotal.

DISPOSAL: When container is empty, press valve to release all remaining pressure. Dispose of empty container in household garbage.
