Canada

KEMTREET 880 is a highly effective fungicide and bactericide for use in controlling the growth of bacteria and fungi found in industrial recirculating water cooling towers, air washers, and evaporative condensers.

Industrial Recirculating Water Cooling and Evaporative  
Condensers:

Dosages for industrial recirculating water cooling towers or evaporative condensers will depend on the condition of the

systems prior to treatment initiation. Systems which are heavily contaminated should be cleaned first. Apply KEMTREET 880 to the cleaned system or when growth is first noticed, according to the following schedule.

Initial Dose: Apply 120 mL for each 1000 litres of water in the system (120 ppm). This dose may be repeated once, twice or three times weekly or as required to control the growth of slime-forming organisms.

Subsequent Dose: When microbial growth is evident, add 20 to 40 mL of product per 1000 litres of water (20 - 40 ppm) in the system every three days or as needed. NOT FOR USE IN POTABLE WATER SYSTEMS.

Air Washers:

In treating air washer systems, preclean by introducing a suitable detergent solution into the system such as COILEX and allow air washer to run with fan off for two hours. Flush. Check all nozzles and manually clean those that are plugged. Add KEMTREET 880 as specified under dosages for Cooling Towers. Note: To be used only in Air Washers equipped with effective mist eliminators.

KEMTREET 880 should be dosed directly into the sump of basin or any other location where good distribution can be assured.

#### DISPOSAL:

1. Rinse the emptied container thoroughly and add the rinsings to treatment site.
2. Follow provincial instructions for any required additional cleaning of the container prior to its disposal or reconditioning.
3. Dispose of the container in accordance with provincial requirements.
4. For information on the disposal of unused, unwanted product and the cleanup of spills contact the regional office of Conservation and Protection Service, Environment Canada.
5. For small spills. Recover free liquid. Soak up residue with solids absorbent. DO NOT FLUSH INTO SURFACE STREAMS. INFORM ENVIRONMENT CANADA AS IN #4.

#### Precaution

This product is toxic to fish. Treated effluent should not be discharged where it will drain into lakes, streams, ponds or public water. Do not contaminate water by cleaning of equipment or disposal of wastes.

KEMTREET 880 is not recommended for potable water or where contamination of potable water can occur. Do not use with Chromate type treatments.

WARMING - EYE IRRITANT

Causes eye and skin irritation. Do not get in eyes, on skin, or on clothing. Wear goggles or face shield and rubber gloves when handling. Harmful if swallowed. Avoid contamination of food.

FIRST AID

In case of contact, immediately flush eyes or skin with plenty of water for at least 15 minutes. For eyes, call a physician. Remove and wash contaminated clothing before reuse.

If swallowed, drink promptly a large quantity of milk, egg white, gelatin solution, or if these are not available, drink large quantities of water. Call a physician immediately. KEEP OUT OF REACH OF CHILDREN.

Notice to User: This control product is to be used only in accordance with the directions on this label. It is an offence under the Pest Control Products Act to use a control product under unsafe conditions.
