SWIMMING POOL CHEMICALS
REG. NO. 22129 P.C.P. ACT
DIMAR POOL SALES & SERVICE

SANITIZER 12

CHLORINATING LIQUID
CONTROLS BACTERIA AND ALGAE

In Swimming Pool Waters

DOMESTIC

GUARANTEE:

Sodium Hypochlorite 10.8%

WARNING

CORROSIVE

DANGEROUS GAS FORMED WHEN MIXED WITH ACID

READ THE LABEL BEFORE USING

NET CONTENTS:

Evergreen Nursery
187 Southdale Rd. W.
London, Ont. N6J 2J2

1599 Highbury Ave. N.
London, Ont. N6A 4B9

DIRECTIONS FOR USE

1. Maintain recommended daily levels as determined by testing kit:

Chlorine: 1.0 - 3.0 ppm

pH: 7.2 - 7.8
Total Alkalinity: 100 - 120 ppm
Calcium Hardness: 200 - 300 ppm

2. Superchlorinate pool water initially with 1 litre SANITIZER 12 per 10,000 litres of pool water. For best results superchlorinate at dusk.
3. Chlorinate daily to maintain proper chlorine residual with 250 millilitres of SANITIZER per 10,000 litres of pool water, or as needed.

NOTE: Hot weather, heavy pool usage and rain, may require higher dosage rates to maintain proper chlorine residuals.

4. Superchlorinate weekly with 1 litre per 10,000 litres if average daily temperature is 25°C - 32°C. Otherwise, superchlorinate every other week.
5. For visible algae, superchlorinate with 2 litres of Sanitizer 12 per 10,000 litres of pool water. Heavy algae infestation may require dosages of up to 3 litres per 10,000 litres. Wait at least 24 hours and vacuum pool when dead algae settles.

NOTE: For outdoor pools, chlorine residuals can be protected from destruction by sun's rays by addition of cyanuric acid (stabilizer).

6. For wading pools, maintain chlorine residual of 3 - 5 ppm by chlorinating daily by adding 45 millilitres per 1,000 litres of pool water, or as needed.

PRECAUTIONS:

- Keep out of reach of children.
- Do not mix with any other chemical.
- Dangerous gas formed when mixed with acid.
- Avoid contact with skin and eyes.
- Harmful if swallowed.
- Keep container closed and store in a cool location.
- To dispose of chemical, flush into sewer with large quantities of water.
- Flush thoroughly with water before disposing.

FIRST AID

If splashed in eyes or on skin, flush thoroughly with water for 15 minutes. If eye irritation persists get medical attention.

If swallowed, give one or two glasses of milk or warm water.
Call a Physician IMMEDIATELY. Keep patient warm.
