Do not Rinse.

Do not contaminate with any other materials.

Keep container sealed at all times when not in use.

FLAMMABLE LIQUID, N.O.S. (XYLENE) U.N. NUMBER 1993

DIRECTIONS FOR USE:

Greenhouse-grown roses:

MELTATOX can be used on all rose varieties grown commercially under glass, excluding the variety Tropicana (Superstar) and certain cultivars of Tropicana such as "Command Performance" which may be susceptible to occasional leaf bleaching. Apply MELTATOX at the rate of 2.5 mL per litre of water (2.5 L in 1000 L) at 10-14 day intervals during the period when mildew infection can occur. In cases of serious risk of infection, the intervals between applications should be reduced to 5-8 days. Where severe cases of mildew are already present, apply 2 or 3 sprayings at 3 day intervals, followed by further spraying at normal intervals. To prevent possible plant damage under hot and sunny conditions, the humidity in the greenhouse should be increased several hours prior to application.

Field-grown roses:

Use the same directions as listed under greenhouse roses. To prevent possible plant damage, do not spray MELTATOX under hot, sunny and low humidity conditions.

COMPATIBILITY:

MELTATOX may be mixed with standard formulations of commercial fungicides such as Polyram and maneb, and insecticides, such as dimethoate and malathion, as well as with foliar nutrient solutions. Certain fungicidal mixtures may cause visible deposit on the plants.

MIXING:

1. The recommended quantity of MELTATOX should first be mixed with a small quantity of water, then added to the bulk of water in the spray.
2. Agitate before using.
3. If used in mixtures with other products each product should be added separately to the spray tank.

PRECAUTIONS:

1. Keep out of reach of children.
2. Keep container sealed at all times when not in use.

3. Do not take internally.
4. Meltatox can be irritating to the skin and nose and must be kept away from eyes. Thus, avoid inhalation of vapour, dust, or spray mist and contact with eyes, skin or clothing.
5. Wash thoroughly after handling and before eating, drinking or smoking.
6. Meltatox can cause serious and permanent eye damage. Wear protective equipment and clothing including goggles or face shield, approved respirator, gloves (rubber, PVC neoprene or nitrile), hat, long-sleeved shirt, trousers and rubber boots.
7. If clothing becomes contaminated, remove and wash separate from household laundry before reuse.
8. Toxic to fish-do not contaminate domestic or irrigation water, lakes, stream or ponds by the cleaning of equipment or disposal of wastes.
9. Clean spray equipment thoroughly after use.

FIRST AID INSTRUCTIONS:

IN CASE OF EYE CONTACT: Flush immediately with flowing water for at least 15 minutes. Consult a physician if irritation develops.

IN CASE OF SKIN CONTACT: Wash with soap and water. Remove contaminated clothing and wash separate from household laundry before reuse. Consult a physician if irritation results.

IF SWALLOWED: DO NOT INDUCE VOMITING. Give water or milk. Consult a physician immediately.

IF INHALED: Remove person to fresh air. Assist breathing if necessary. Consult a physician immediately.

STORAGE:

1. Store in original, tightly-closed container.
2. Do not ship or store near food, feed, seed or fertilizers.
3. Store in a cool, dry, locked, well ventilated area without floor drain.
4. Herbicides should be shipped or stored separate from other

pesticides to avoid cross-contamination.

5. Keep away from moisture and temperatures above 50EC.
6. Protect from freezing.

DISPOSAL:

1. Do not rinse.
2. Do not contaminate with any other materials.
3. Return to Plant Products for refund.

NOTICE TO USER:

This control product is to be used only in accordance with the directions on this label. It is an offence under the Pest Control Products Act to use a control product under unsafe conditions.

NOTICE TO BUYER:

Seller's guarantee shall be limited to the terms set out on the label and subject thereto, the buyer assumes the risk to persons or property arising to the use of handling of this product and accepts the product on that condition.
