3M Canada Inc., London, Ontario N6A 4T1

CAUTION: For use on cats and dogs only to control cat fleas, dog fleas, American dog ticks and brown dog ticks. Some animals, particularly cats and kittens, may be sensitive to insecticides.

See "Directions for Use" for specific application information. If adverse reactions are observed, (e.g. heavy salivation, lethargy, breathing difficulties, or other unusual reactions), bathe pet immediately in warm, soapy water. If symptoms persist, seek medical attention. Because some animals, particularly cats and kittens, may be sensitive to insecticides, do not exceed the recommended application rate on cats and kittens unless so advised by your veterinarian. Do not use on nursing females or on puppies or kittens under 8 weeks of age. Do not use on sick or convalescent animals. Do not use on animals under drug or pesticide treatment. Before use on pregnant animals, consult your veterinarian.

SHAKE WELL BEFORE USE AND OCCASIONALLY WHILE USING

DIRECTIONS FOR USE

1. For best results, before spraying, bathe and shampoo the pet with a shampoo recommended by your veterinarian.

2. Rub off excess water with a towel. Your pet does not have to be thoroughly dried.
3. Adjust the nozzle on the bottle of "Sectrol" Pet Spray to deliver a coarse spray. Hold sprayer within a few inches of the haircoat. Apply "Sectrol" Pet Spray so that your pet is moist - not soaked.
4. Start by spraying your pet's head (avoiding contact with the eyes and mouth) and work your way back to the hind quarters. Spray under the haircoat by backcombing against the direction of hair growth with your other hand.
5. Rough up the hair as needed to expose skin to insecticide. It is important to apply "Sectrol" Pet Spray as evenly as possible over your pet's body because fleas will migrate to untreated areas (e.g. toes, foot pads, around the ears, etc.).
6. Applying this product at the level described above will provide rapid flea kill and at least 8 days residual activity.
7. Allow your pet to dry. Do not towel dry as this will remove many of the "Sectrol" Pet Spray microcapsules. (These microcapsules provide the insecticide's time-release residual activity.) A blow dryer works well to shorten the drying time.
8. If required, reapply "Sectrol" Pet Spray weekly. In addition to treating your pet directly, control of fleas in your pet's environment is important if you wish to eliminate fleas from your home. Ask your veterinarian about "Duratrol" Household Flea Spray.

PRECAUTIONS:

KEEP OUT OF REACH OF CHILDREN

Avoid contact with eyes. Avoid breathing spray mist. Keep container closed when not in use. Cover or remove fish bowls and aquaria. Wash hands after spraying and before eating or smoking. This product may pose a hazard to pollinating insects. Do not contaminate food, utensils or food handling areas or surfaces.

FIRST AID:

IN CASE OF CONTACT WITH EYES, IMMEDIATELY FLUSH WITH PLENTY OF WATER. IF IRRITATION PERSISTS, GET MEDICAL ATTENTION. IF ON SKIN, WASH WITH SOAP AND WATER.

CAUTION: CONTAINS A PETROLEUM DISTILLATE. IF SWALLOWED, DO NOT INDUCE VOMITING. SEE PHYSICIAN.

Storage and Disposal: Do not contaminate water, food or feed by storage or disposal. Do not reuse container. Dispose in a safe place according to provincial regulations. Do not store below 0 deg. C. If exposed to temperatures below 0 deg. C thaw completely and mix well before using.

NOTICE TO BUYER:

Seller's guarantee shall be limited to the terms set out on the label and subject thereto, the buyer assumes all risk to persons or property arising from the use or handling of this product and accepts the product on that condition.
