CRYSTALS when exposed to the air, it evaporates, releasing a vapor which kills clothes moths and larvae and carpet beetles, when used as directed.

DIRECTIONS: First thoroughly brush the articles to be stored. Place the garments, furs, woolens, etc., in an air tight trunk, chest, box or bag. Close the container tightly. Crystals are especially adapted for refilling vaporizers and for use in de-mothing equipment.

All cracks or holes should be sealed with adhesive tape to prevent loss of vapor and entry of insects.

AS A DEODORANT: Place crystals in an open container. The crystals evaporate freely producing a pleasant odor.

CAUTION: Harmful if swallowed. Keep out of the reach of children. If swallowed give water and induce vomiting. For eye contamination flush with running water. In case of accident get prompt medical attention.
