DIRECTIONS FOR USE: For use as crack and crevice treatment or spot treatment to control insects mentioned on the front panel. Shake well before use. Hold container approximately 30 cm from surface being sprayed and spray until wet. Thorough applications produce a coating which will vaporize into crack and crevices for insect control. If reinfestation occurs, repeat applications as necessary. Provide adequate ventilation after indoor use.

KEEP PETS AND CHILDREN AWAY FROM SURFACE UNTIL DRY.

INDOOR USE: Thoroughly treat cracks, crevices, baseboards, underneath furniture and equipment, around garbage containers, localized areas of floors and floor coverings and other places where insects are seen. For ticks and fleas, treat sleeping quarters of pets and floor coverings (rugs and carpets). **Remove pets and animals before spraying and keep them away from sprayed areas until dry.** Replace bedding in animals' quarters after treatment. **Do not treat animals.** Do not treat animals with this product. For effective flea and tick control, pets should be treated with a registered flea and tick control product designed for use on pets such as **Bugcon Fly Flea Free**. (N.B. this product is **not** for use on pets), and treatment of the pet must be combined with the cleanup and sanitation of any area used by the pet. Vacuum floors, carpets, and furniture (discard vacuum bag after use) and wash the pet's living quarters, and surrounding areas prior to treatment with this product. Do not use in areas where food is prepared handled or stored.

OUTDOOR USE: Spray outside surfaces of screens, doors, window frames, foundations, patios, light fixtures and other places where insects may alight, or congregate and enter.

Wasp and hornet nests: Releases a fine spray that allows treatment of nests from one meter away. Treat at night or late evening when insects are inside the nest. Apply spray with 2-3 seconds burst directly into the nest opening so that the liquid contacts the inside of the nest. If unable to spray directly into the nest, a heavy residual spray around and into the opening where insects gain entrance will eventually eliminate the pests. Repeat as necessary.

PRECAUTIONS: KEEP OUT OF REACH OF CHILDREN.

EXTREMELY FLAMMABLE. Contents under pressure. Avoid contact with eyes, skin or clothing. Do not puncture or incinerate. Do not expose to temperatures over 50°C. Do not use near open flame or spark. Do not smoke while using. Do not spray towards eyes. Harmful if swallowed, inhaled or absorbed through the skin. Avoid breathing of spray mist and use with adequate ventilation. Do not use as a space spray. Remove pets and cover fish bowls before spraying.

FIRST AID: If on skin, wash with soap and water. **If in eyes,** rinse with plenty of water. If irritation persists, consult a physician. **If swallowed,** contact a physician or poison control centre IMMEDIATELY. Take container, label or product name and Pest Control Product Registration Number with you when seeking medical attention.

TOXICOLOGICAL INFORMATION: Propoxur is a mild cholinesterase inhibitor. Atropine is antidotal.

NOTICE TO BUYER: Seller's guarantee shall be limited to the terms set out on the label and, subject thereto, the buyer assumes the risk to persons or property arising from the use or handling of this product and accepts the product under that condition.

DISPOSAL: When container is empty, press button to release all pressure, then wrap and dispose in household garbage. Do not puncture or incinerate.
