BASIC-G HIGHLY CONCENTRATED
GERMICIDAL SOLUTION, LIQUID

RISK PHASES: Poisonous, corrosive to skin, eyes and clothes.

HEALTH HAZARD DATA: contains quaternary ammonium disinfectants.

EFFECTS OF OVEREXPOSURE: Acute for skin and eyes.

PRECAUTIONARY MEASURES: Keep out of the reach of children.

SPECIFIC PERSONAL PROTECTIVE EQUIPMENT: EYES: Safety goggles or face shield. HANDS: Rubber gloves. OTHER CLOTHING AND EQUIPMENT: Rubber apron when handling concentrate, eyewash fountain desirable. Harmful or fatal if swallowed. Avoid contamination of food.

FIRST AID MEASURES: EYES: Flush with copious amounts of water for 15 minutes. Consult a physician. SKIN: Flush with water.

Remove and wash contaminated clothing before reuse. INGESTION: Drink large quantities of milk, egg whites, gelatin solution; or if these are not available, drink large quantities of water. Call a physician immediately.

BASIC-G(R)

51750

Basic-G(R) is specially formulated to reduce the hazard of cross-infection from environmental surfaces, a major housekeeping concern, not only in hospitals, but also in schools, institutions and industry. Basic-G cleans with biodegradable agents while it disinfects and is even virucidal when used as directed. Basic-G will deodorize toilet areas, behind and under sinks and counters, and garbage cans, and will inhibit the growth of mould and mildew and their odours when used as directed.

DIRECTIONS FOR USE: May be used in the presence of moderate amounts of organic soil. Apply Basic-G to walls, floors and other hard (inanimate) non-porous surfaces such as tables, chairs, countertops, sinks and bedframes with a cloth, mop or Shaklee Spray Unit so as to thoroughly wet the surfaces. For heavily soiled areas, a preliminary cleaning is required. Prepare a fresh solution daily or when use solution becomes visibly dirty.

Sanitizing - To sanitize porous or non-porous, non-food contact surfaces (floors, walls, tables, etc), add 1.5 mL to 1 litre of water. Allow treated surfaces to remain wet for 30 seconds. Basic-G is effective in waters up to 600 ppm hardness against *Staphylococcus aureus* and *Klebsiella pneumoniae* in the presence of 5% serum on porous and non-porous environmental surfaces.

Disinfection - To disinfect hard, non-porous surfaces, add 4 mL to 1 litre of water. Treated surfaces must remain wet for 10 minutes. Do NOT mix Basic-G with other cleaners as they may reduce its germicidal effectiveness. Rinse food contact surfaces with potable water before re-use. At this use-level, Basic-G is also virucidal* and fungicidal**. Used as directed, Basic-G has been found to be effective in the presence of 5% serum against the following by the AOAC Use-Dilution Test: *Pseudomonas aeruginosa*, *Staphylococcus aureus*, *Salmonella choleraesuis*, *Escherichia Coli*, *Klebsiella pneumonias*, *Enterobacter aerogenes*, *Salmonella schottmuelleri*, *Streptococcus faecalis*, *Shigella*

dysenterise, and Brevibacterium ammoniagenes. Fungicidal performance Trichophyton mentagrophytes (the athlete's foot fungus) was determined by the AOAC Fungicidal Test. Use on surfaces in locker rooms, shower rooms and bath areas, exercise areas, dressing rooms, etc.

* Basic-G is virucidal on inanimate environmental surfaces against Herpes Simplex (a member of the virus family that causes infectious mononucleosis), Vaccinia (representative of the pox virus), and Influenza A2 (the Hong Kong flu virus).

** Basic-G inhibits the growth of mould and mildew and the odours caused by them when applied to hard, non-porous surfaces as directed above. Allow to dry on surface and repeat when mildew growth returns.

CAUTIONARY STATEMENTS: Basic-G is concentrated for economy. Handle with care. KEEP OUT OF THE REACH OF CHILDREN. Danger - corrosive to eyes. Do not get in eyes, on skin or on clothing. Harmful if swallowed. Avoid contamination of food.

CONTAINER DISPOSAL: Thoroughly rinse and dispose in an incinerator or regular trash collection. Do not re-use container.

FIRST AID: In case of contact, immediately flush eyes or skin with plenty of water for 15 minutes. For eyes, call a physician. Remove and wash contaminated clothes before re-use. If swallowed, promptly drink a large quantity of milk, egg whites or gelatin solution; or, if these are not available, drink large quantities of water. Avoid alcohol. Call a physician immediately.

TOXICOLOGICAL INFORMATION: Probable mucosal damage may contraindicate the use of gastric lavage. Measures against circulatory shock, respiratory depression and convulsion may be needed.

NOTICE TO USER: This control product is to be used only in accordance with the directions on this label. It is an offence under the Pest Control Products Act to use a control product under unsafe conditions.
