WEIGHT PER TABLET 20g

AQUABROME Brominating Tablets when used as directed, are effective as a swimming pool water sanitizer and disinfectant.

WARNING: Direct tablet contact may cause bleaching of vinyl or painted pool surfaces. Automatic feeding devices employing these tablets must be totally free from traces of other pool sanitizers to avoid the probability of an explosion.

DIRECTIONS FOR USE:

1. Maintain recommended daily levels as determined by testing kit.

Free available bromine:	1.0-3.0 ppm
pH:	7.2-7.8
Total Alkalinity:	100-150 ppm
Calcium Hardness:	200-300 ppm

2. If using in automatic feeding device, fill the chamber(s) with tablets and adjust flow rate, according to manufacturer's recommendations, to maintain proper bromine residual. Adding tablets to the pool's skimmer basket is an alternative bromine feed method. Daily usage should approximate 25 g of AQUABROOM Brominating Tablets per 10,000 L of pool water.
3. Periodic superchlorination of pool water is recommended. Follow label instructions of superchlorination product being employed.

PRECAUTIONS: Keep out of the reach of children. Dangerous gas formed when mixed with acid. Do not mix with any other chemical. Strong oxidizing agent. May cause fire or explosion if contaminated. Avoid contact with skin and eyes. Avoid breathing dust. Harmful if swallowed. Keep container closed and store in a cool, dry location. Rinse container thoroughly before discarding. Do not reuse. To dispose of chemical, flush into sewer with large quantities of water.

FIRST AID TREATMENT: If splashed in eyes or on skin, flush thoroughly with water for 15 minutes. For eye contact, get medical attention. If swallowed, drink one glass of milk or water. Call a Physician or Poison Control Centre immediately.
