Grow ~~n~~= CareJ Fungus Gnat Dust

Fungus Gnats are tiny dark flies that can be seen on the soil or leaves. They fly up when plants are disturbed. Their larvae, which are white with black heads, may be visible on soil surface after watering. In the soil they feed on fungus and plant roots. In sufficient numbers the larvae can weaken the plant and cause it to die. After two weeks of feeding, larvae mature. There can be many generations in one year.

DIRECTIONS:

Later's Fungus Gnat Dust is ready-to-use and controls Fungus Gnat larvae and other insects that live in houseplant soil.

HOW TO USE: Apply Later's Fungus Gnat Dust lightly to soil around the plant and water in. Repeat as needed but no more than once every 2 months.

PRECAUTIONS: KEEP OUT OF REACH OF CHILDREN. Do not allow dust to contact food, food preparing surfaces, utensils, or drinking water. Wash contaminated surfaces and utensils with soap and water. Avoid contact with dust as it may cause irritation to eyes or skin. Avoid inhaling dust. Wash thoroughly with soap and water after using.

ENVIRONMENTAL HAZARDS: This product is toxic to fish. Avoid contamination of fish ponds and fish aquaria. Do not use in animal buildings or poultry houses.

FIRST AID: IF SWALLOWED, induce vomiting and contact a doctor or poison control centre. Never give anything by mouth to an unconscious person. IF IN EYES, flush with water for 15 minutes and get medical attention. IF ON SKIN, wash with soap and water.

TOXICOLOGICAL INFORMATION: Chlorpyrifos is a cholinesterase inhibitor. Treat symptomatically. Atropine by injection only is an antidote.

STORAGE: Keep product in original container. Store in a cool, dry place away from food.

DISPOSAL: Do not re-use container. Wrap container in newspaper and dispose of in regular garbage.

Seller's guarantee shall be limited to the terms set out on this label and subject thereto, the buyer assumes the risk to persons or property arising from the use or handling of this product and accepts the product on that condition .
