Poly[oxyethylene[dimethyliminio] - Ethylene
[dimethyliminio] ethylene dichloride]].....50%

1 L

HYDROTECH
CHEMICAL CORPORATION

P.O. Box 10, Station "D", Scarborough, ONT, M1R 4Y7

DIRECTIONS FOR USE:

WHAM-O is used to control the growth of algae in swimming pools. For maximum effectiveness, pools containing heavy growth of algae should be cleaned prior to using WHAM-O.

For pools having just visible algae growth add an initial dose of 90 to 150 mL of WHAM-O per 10,000 L of water and remove settled algae debris by cleaning.

For treatment of a freshly cleaned and filled pool, add initially 60 to 150 mL of WHAM-O per 10,000 L of water.

To maintain pools free of visible algae growth, subsequent additions of 20 to 50 mL of WHAM-O per 10,000 L of water should be made every 5 to 7 days after the initial treatment.

Uniform distribution of WHAM-O throughout the water in the pool is necessary for maximum effectiveness.

WHAM-O is compatible with those chemicals normally used to treat pools and is effective at both acid and alkaline pH. WHAM-O can be used in pools treated with chlorine chemicals and may reduce the amounts of those chemicals normally required. However, do not mix WHAM-O with concentrated dry or liquid chlorine products.

TOXICOLOGICAL INFORMATION:

May cause minimal transient ocular irritation. Non-toxic.

FIRST AID INSTRUCTION:

In case of contact flush with plenty of water for at least 15 minutes. If eye irritation persists get medical attention.

PRECAUTIONS:

Keep out of reach of children. Harmful if swallowed. Do not get in eyes. Avoid contact with skin.

RINSE EMPTY CONTAINER THOROUGHLY WITH WATER BEFORE DISCARDING. DO NOT REUSE.

ENVIRONMENTAL HAZARDS.

This product is toxic to fish. Treated effluent should not be discharged where it will drain into lakes, streams, ponds, or public water. Apply this product only as specified on this label.
