## MOUSE-BUSTER(TM)

MAY BE USED IN AREAS ACCESSIBLE TO CHILDREN AND PETS

KILLS MICE IN ONE FEEDING

RATAK is a registered trademark of Imperial Chemical Industries PLC, England and C-I-L Inc., is a licensed user.

May be used in areas accessible to children and pets and where food is prepared or stored. For best results, place one MOUSE-BUSTER Mouse Killer along walls every 3-4 meters where mouse activity has been observed.

### GENERAL INFORMATION

MOUSE-BUSTER Mouse Killer is specifically designed to be used for the control of house mice in and around homes. This ready-to-use product is designed for use in areas where mice have been seen and that are in proximity to places frequented by children and pets, or where food is prepared or stored. The MOUSE-BUSTER Mouse Killer may be dispensed by building owners, pest control operators, custodians and other personnel to assist in mouse control programs.

### DIRECTIONS FOR USE

This product is not refillable and no attempt should be made to open the MOUSE-BUSTER Mouse Killer. DO NOT ALLOW CHILDREN TO PLAY WITH THE MOUSE KILLER, EVEN WHEN EMPTY. Check the contents frequently and replace the units as needed. Secure one MOUSE-BUSTER Mouse Killer every 3-4 meters along walls where mouse activity has been noticed. Dispose of dead mice and empty Mouse Killers properly (see "DISPOSAL" statement). To prevent reinfestation, eliminate food, water and shelter as much as possible. Do not place the MOUSE-BUSTER Mouse Killer in direct sunlight or in direct proximity to heating devices such as registers, wood burning stoves, baseboard heaters, heating vents, etc. in order to prevent melting of the bait block.

### PRECAUTIONS

The bait contained within the MOUSE-BUSTER Mouse Killer may be harmful or fatal if swallowed. Keep loose bait away from humans and domestic animals, wildlife and pets. Do not use the Mouse Killer if bait appears loose, and if loose bait is observed within the Mouse Killer dispose of the baiter in accordance with the "DISPOSAL" statement. If bait is swallowed call a physician or local Poison Control Centre at once.

## TOXICOLOGICAL INFORMATION

The bait in this product contains brodifacoum, a vitamin K<sub>1</sub> inhibiting anticoagulant. Severity of poisoning may be evaluated by monitoring prothrombin time. Vitamin K<sub>1</sub> is antidotal. For further information, contact CHIPMAN at (416) 643-4123 (8:00 a.m. to 5:00 p.m. Eastern Time) or call (416) 528-6771, 24 hours (specify as calling for CHIPMAN).

## ENVIRONMENTAL HAZARDS

This product is toxic to fish, birds and wildlife. The bait can pose a secondary hazard to birds of prey and animals. Keep out of any body of water.

## STORAGE

Do not contaminate food, water or feed by storage or disposal.

## DISPOSAL

Do not attempt to open the MOUSE-BUSTER Mouse Killer or to use the empty container for other purposes. Securely wrap the entire unit in several layers of newspaper and place in garbage. Do not allow children or pets to play with the empty units. Do not incinerate or burn.

## MOUSE-BUSTER Mouse Killer

This ready-to-use MOUSE-BUSTER Mouse Killer contains a highly effective rodent bait that kills mice resistant to Warfarin baits.

## DIRECTIONS FOR USE

1. Select an area where mouse droppings have been seen or where mouse activity has been observed.
2. Secure one MOUSE-BUSTER Mouse Killer every 3-4 meters along a wall in these areas by removing the protective backing on the tape and by pressing the unit on to a clean dry surface. The best placement is in house out-of-the-way locations and tight areas that mice like to hide in and use for shelter.
3. Monitor consumption of bait within the unit and when the MOUSE-BUSTER Mouse Killer is found empty, replace with another Mouse Killer unit. Continue placement of the Mouse Killer units until all signs of mouse activity has ceased.
4. RETAIN CARTONETTE TO ACCESS INFORMATION IN CASE OF EMERGENCY.
