HOLDER ASSEMBLY INSTRUCTIONS INSIDE DIRECTIONS: This package contains one resin vaporizer strip impregnated with dichlorvos insecticide, in a sealed pouch to prevent vapour loss. For use, remove the strip from the pouch and suspend with the accompanying cage and hook in an enclosed space of up to 30 cubic metres. When the cage is adjusted to its "open" position, the strip gives off a virtually odourless insecticidal vapour which will provide control of flies, mosquitoes and other small flying insects for

up to four months. The strip is NOT designated to repel or kill insects instantly nor will it function while the cage is in its "closed" position. Allow free air movement but hang strip away from open windows and doors where excessive ventilation may reduce efficiency. Strips should be at least 3 metres apart. Dispose of empty package and used strip in the garbage.

USES: For use in animal and farm buildings, milk rooms, homes, cottages, cabins, trailers, tents, attics, basements, garbage storage areas and containers, kennels, commercial locations, and similar enclosed spaces.

PRECAUTIONS: Harmless when used according to label directions. To avoid misuse, observe the following precautions. Keep out of reach of children and household pets. Wash hands after handling. Do not use in areas where the chronically ill may be exposed or in occupied spaces of less than 25 cubic metres. Certain tropical fish and caged birds may be harmed by continuous exposure to vapour. Do not use in areas where beekeeping equipment and/or supplies are stored. Follow good sanitary practice by regular collection and disposal of dead insects.

NOTICE TO USER: This control product is to be used only in accordance with the directions on this label. It is an offense under the Pest Control Products Act to use a control product under unsafe conditions.

This label transcript service is offered by the Pest Management Regulatory Agency to provide efficient searching for label information.
