Kills and repels insects. Kills on contact up to 6 metres away.
Provides a fogging action over a large area and kills flies,
mosquitoes, flying moths, wasps and hornets.

DIRECTIONS: Shake before using. Point valve opening away from
face. Hold can on slight downward angle.

FOR OUTDOOR USE: For best results spray when air is calm. Allow
fog to drift over area. Direct spray toward bushes or grass from
at least 1.5 to 2 metres away. Because insects may move in from
other areas, treat an area larger than you plan to use. Repeat

as necessary. Also spray legs of tables and chairs to repel insects.

FOR USE IN GARAGES, COVERED SCREENED PATIOS: Direct spray towards ceiling or rafters using a sweeping motion. About 12 seconds of spraying should clear an average area (28 cubic metres). Keep garage closed for 15 minutes. Ventilate sealed area after treatment.

PRECAUTIONS: KEEP OUT OF REACH OF CHILDREN. Do not use in the home. Avoid inhaling spray. Avoid contact with skin, eyes and clothing. Avoid contamination of feed and food. Do not contaminate mangers, drinking troughs or utensils. Wash after handling or using. Avoid contamination of ponds, lakes, streams, and other bodies of water which contain fish life or which may be used for irrigation or domestic purposes.

CONTENTS UNDER PRESSURE. Do not place in hot water or near radiators, stoves or other sources of heat. Do not puncture or incinerate container or store at temperatures over 50 deg C.

FIRST AID: If on skin, wash thoroughly with soap and water. If in eyes, flush with plenty of water for 15 minutes. If irritation persists consult physician. If swallowed, do not induce vomiting - contact a poison control centre and consult physician immediately, bring container with you.

DISPOSAL: When empty, press button to release pressure, dispose of in household garbage.
