

Mouse Repels

Ultrasonic Rodent Repeller

Repels mice and rats from areas where ultrasonic soundwaves are present.

DOMESTIC

READ THE LABEL AND OWNER'S MANUAL BEFORE USING. KEEP OUT OF REACH OF CHILDREN.

Model MR105

Direct plug-in design

Powerful 130 dB output

Covers areas up to 46m²

Safe to use around non-rodent pets

Ultrasound cannot be heard by the average person

90 day money back guarantee

1 year limited warranty plus 2 year extended warranty

CSA approved

Reg. No. 28803 PCP ACT

For use with and in conjunction with normal control practices.

The Ultrasonic Tool

Ultrasound consists of electronically generated ultrasonic sound waves, broadcast at a high volume. It can cause rodents to avoid a sound protected area. While the sound can't be heard by humans, domestic pets, farm animals, birds, or fish, research proves it is irritating to rodents (including hamsters, gerbils, guinea pigs and rabbits), and can cause them to leave the transmitting area.

What is Ultrasound?

It is sound waves with frequencies too high to be heard by the human ear. The average person can hear sound waves ranging from 20 up to 20,000 cycles per second, while dogs perceive them up to 27,000 per second, and the range of other animals is even higher. When measured electronically, these frequencies are expressed in hertz, defined as a unit equal to one cycle per second. So ultrasonic sound waves are frequencies over 20 kilohertz.

Using Your Mouse Repels

■ Place the equipment on a table, shelf or mount on the wall. Best placement is 0.5 to 1 m off the floor with the speaker grill aimed at known problem areas.

■ Ultrasonic sound is highly directional and will be reflected by hard surfaces to literally fill a room with the sound pressure.

■ Mouse Repels should be used in rooms where signs of mouse or rat activity is observed, particularly in areas where food is consumed, prepared or stored. Storage areas and paper products often attract mice and rats.

Answers to Questions about Ultrasonic Pest Repelling Devices

Q.Does ultrasonic sound kill rats and mice?

A.No. It repels rats and mice by creating an acoustically hostile environment.

Q.Which pests does Mouse Repels affect?

A.Mice and rats. NOTE: Pet rodents, such as hamsters, gerbils, guinea pigs, and rabbits may also be bothered in an ultrasonically protected area.

Q.Can ultrasound repel rats and mice in walls?

A.No. Ultrasound is directional and can't penetrate anything solid. For problems with pests in walls or foundations, contact a professional pest control operator.

Q.Can I do away with pesticides and/or traps?

A.No. Ultrasound is one tool used in an integrated pest management program. It should be utilized in combination with other pest control methods.

Q.What coverage can I expect from Mouse Repels?

A.One Mouse Repels unit is capable of covering a typically sized room found in a family home. Most homes will require multiple units. Ultrasound is highly directional and will be reflected by hard surfaces to fill a room with ultrasound. Soft surfaces such as drapery will absorb sound and reduce the area protected by Mouse Repels.

How it works:

- Mouse Repels produces ultrasonic waves in a frequency range of 30kHz to 64kHz at 130 dB from the ultrasonic device.
- Can repel rodents from areas where ultrasonic soundwaves are present. Use Mouse Repels with other pest control methods in controlling rats and mice.

Ideal for:

**Homes and Apartments
Farm Buildings
Boats and RVs
Domestic Kennels and Stables**

Benefits:

Easy to Use - Compact unit plugs into any 110 VAC wall outlet.
Won't affect humans, domestic pets, farm animals, birds or fish; doesn't interfere with radio or television sets, electrical appliances, garage door openers, or pacemakers.

Impacts on:

**Repels Rats and Mice.
(Do not keep rodent pets, gerbils, rabbits, hamsters or guinea pigs in an ultrasonically protected area.)**

ONE YEAR LIMITED WARRANTY

Bryan's Technologies warrants to the original consumer/purchaser that your Mouse Repels will be free from defects in workmanship and material for ONE YEAR from the date of purchase. Your Mouse Repels will be replaced or the purchase price refunded at dealer option, during the warranty period. Return it to your dealer. The warranty does not apply to Mouse Repels units damaged by accident, abuse, misuse, improper voltage, water damage, nor does it apply if the product has been altered or repaired by anyone other than the manufacturer. Your dealer may require proof of purchase should you need to exercise this warranty. We recommend that you file your purchase receipt with this warranty.

NEW TWO YEAR EXTENDED WARRANTY

Bryan's Technologies offers extended coverage should a defect be identified after the one year limited warranty has expired. Bryan's Technologies will repair or replace the defective product with the same or functional equivalent (at factory option) for a period not exceeding three years from date of purchase, for a service charge only.
